Guidance notes for use of onscreen PDF assessments

Wherever possible, the following paper has been edited to allow candidates to complete their answers onscreen, without the need for access to a printer. This has been done to assist candidates who need to complete their work remotely.

It should be noted, however, that some of the questions are not suitable for completion in this way, which is unavoidable in the circumstances. In these instances, centres should allow candidates to answer such questions in another format. This may take the form of a photograph of a drawing that the candidate has done offscreen, or a screenshot marked up in some way.
