1 Introduction

This document tells you what you need to do to deliver the qualifications:

<table>
<thead>
<tr>
<th>Area</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Who are the qualifications for?</td>
<td>Candidates wanting to develop some of the key skills and understanding in motor vehicle systems. Successful candidates will have the basic skills needed to apply for an automotive apprenticeship or similar engineering pathway. These qualifications could also be used as an ‘interest’ course for a wide range of learners.</td>
</tr>
<tr>
<td>What do the qualifications cover?</td>
<td>They allow candidates to learn, develop and practise the skills required for employment and/or career progression in the automotive industry.</td>
</tr>
<tr>
<td>Are the qualifications part of a framework or initiative?</td>
<td>These qualifications are part of the Automotive Maintenance and Repair Young and Intermediate Apprenticeship Frameworks (framework 1) which replaced the current framework 4 from April 2011.</td>
</tr>
<tr>
<td>Who did we develop the qualification with?</td>
<td>These qualifications were developed in collaboration with the Institute of the Motor Industry (IMI), the sector skills council for the automotive retail industry and other awarding organisations.</td>
</tr>
<tr>
<td>What opportunities for progression are there?</td>
<td>They allow candidates to progress into employment or to the following City &amp; Guilds qualifications:</td>
</tr>
<tr>
<td></td>
<td>• 4290-13 Level 3 Diploma in Light Vehicle Maintenance &amp; Repair Principles</td>
</tr>
<tr>
<td></td>
<td>• 4270 -12 City &amp; Guilds Level 2 Diploma in Light Vehicle Maintenance &amp; Repair Competence</td>
</tr>
<tr>
<td></td>
<td>• 4270-13 City &amp; Guilds Level 3 Diploma in Light Vehicle Maintenance &amp; Repair Competence</td>
</tr>
</tbody>
</table>

Structure

These qualifications replaced the existing City & Guilds Level 2 Certificate/Diploma in Automotive Vehicle Maintenance and Repair – Light Vehicle (4101-46) which closed for registration on 31/03/2011.

Full qualification certificates will be awarded to successful candidates on completion of the required combinations of units. Candidates completing one or more units, rather than the full qualification(s), will receive a Certificate of Unit Credit (CUC).

</table>
2 Centre requirements

Approval
Centres already approved to offer the Level 2 Certificate/Diploma in Maintenance and Repair - Light Vehicle (4101-46) will be automatically approved to register and certificate candidates on the 4290-12 (unless the centre is already subject to sanctions).

For all other cases, centres will need to gain both centre and qualification approval. Please refer to the Centre guide and Providing City & Guilds Qualifications for further information.

Centre staff should familiarise themselves with the structure, content and assessment requirements of the qualifications before designing a course programme.

Physical resources and site agreements
Centres must have access to sufficient equipment in the college, training centre or workplace to ensure candidates have the opportunity to cover all of the practical activities.

Centre staffing
Staff delivering these qualifications must be able to demonstrate that they meet the following occupational expertise requirements. They should:

- be occupationally competent or technically knowledgeable in the area(s) for which they are delivering training and/or have experience of providing training. This knowledge must be to the same level as the training being delivered
- have recent relevant experience in the specific area they will be assessing
- have credible experience of providing training.

Centre staff may undertake more than one role, e.g. tutor and assessor or internal verifier, but cannot internally verify their own assessments.

Assessor and verifiers
While the Assessor/Verifier (A/V) units are valued as qualifications for centre staff, they are not currently a requirement for this qualification.

Continuing professional development (CPD)
Centres must support their staff to ensure that they have current knowledge of the occupational area, that delivery, mentoring, training, assessment and verification is in line with best practice, and that it takes account of any national or legislative developments.
**Candidate entry requirements**

City & Guilds does not set entry requirements for these qualifications. However, centres must ensure that candidates have the potential and opportunity to gain the qualifications successfully.

Please note that for funding purposes, candidates should not be entered for a qualification of the same type, content and level as that of a qualification they already hold.

**Age restrictions**

The Level 2 Certificate in Light Vehicle Maintenance & Repair (4290-17) is approved for candidates aged 14+ whereas the Level 2 Diploma (4290-12) is only approved for candidates aged 16+.

**Guidance on risk management of pre 16 candidates**

Centres offering the City & Guilds Level 2 Certificate/Diploma in Light Vehicle Maintenance & Repair (4290) to candidates under the age of 16 must assume responsibility for the safe delivery of the qualification. This will include those units that require using and working with power tools and machinery and using and working under lifts and hoists.

In order to ensure that the risk related to the delivery and assessment of this qualification is managed appropriately, City & Guilds requires the Head of Centre to provide a satisfactory risk assessment. The risk assessment should outline those activities within the units which, specific to the centre, may pose a risk or hazard to the safety of the candidate and identify how these risks/hazards will be managed to reduce or alleviate risk.

The risk assessment should be forwarded to your local City & Guilds regional office to be held on file. A copy should be retained by the centre and made available to a City & Guilds external verifier or representative on request.
Initial assessment and induction

An initial assessment of each candidate should be made before the start of their programme to identify:

- if the candidate has any specific training needs,
- support and guidance they may need when working towards their qualification,
- any units they have already completed, or credit they have accumulated which is relevant to the qualification,
- the appropriate type and level of qualification.

We recommend that centres provide an induction programme so the candidate fully understands the requirements of the qualification, their responsibilities as a candidate, and the responsibilities of the centre. This information can be recorded on a learning contract.

Support materials

4 Assessment

Assessment of the qualification
City & Guilds has written the following assessments to use with this qualification:

- Assignments (practical assessment workbooks) comprising of practical tasks and knowledge based questions to cover all learning outcomes. Graded Pass only.
- Online multiple choice tests graded as Pass, Merit, Distinction.
- Assignments can be downloaded from www.cityandguilds.com/automotive. These assessments are carried out in centres and must be completed to current industry standards and practice. It is important to note that although the units within these qualifications bear a close relationship to the VCQ units, they do not imply occupational competence.

Time constraints
The following must be applied to the assessment of this qualification:

- Candidates must complete their assessments within their registration period.

Test specifications
Summary test specifications for all 4290 online tests can be found in the Automotive online test specifications document, downloadable from the 4290 website.

Recognition of prior learning (RPL)
Proxy units/credit transfer
Learners transferring from City & Guilds 4101 NQF qualifications or from another awarding organisation may be exempt from taking the 4290/4270/4291/4271 online multiple choice tests, on production of a valid certificate of equivalent units achieved. Proxy units are available in these circumstances. Please note that a certificate of unit credit (CUC) is not available when claiming a proxy unit. For more information on credit transfer please refer to our 9420 Automotive Apprenticeship Framework centre guide available from www.cityandguilds.com

Full details of the assessment requirements relating to these qualifications can be obtained directly from the Institute of the Motor Industry (IMI) http://www.motor.org.uk

5 Units

Structure of units
These units each have the following:
- City & Guilds reference number
- unit accreditation number (UAN)
- title
- level
- credit value
- unit aim
- relationship to NOS
- learning outcomes which are comprised of a number of assessment criteria
- unit range.

**Relationship to NOS:**
This unit is linked to G1 Contribute to Housekeeping in Motor Vehicle Environment and G2 Reduce Risks to Health and Safety in the Motor Vehicle Environment.

**Assessment requirements specified by a sector or regulatory body:**
This unit was developed by the IMI, the sector skills council for the automotive retail industry. All assessments have been developed in accordance with the IMI Assessment Requirements for VRQs.

**Aim:**
This unit will enable the learner to develop the skills required to:
- carry out day to day work area cleaning, clearing away, dealing with spillages and disposal of waste, used materials and debris.
- identify hazards and risks in the automotive environment and complying with relevant legislation and good practice.
- work safely at all times within the automotive environment, both as an individual and with others.

## Learning outcome

<table>
<thead>
<tr>
<th>The learner will:</th>
</tr>
</thead>
<tbody>
<tr>
<td>1. be able to use correct personal and vehicle protection within the automotive work environment</td>
</tr>
</tbody>
</table>

## Assessment criteria

<table>
<thead>
<tr>
<th>The learner can:</th>
</tr>
</thead>
<tbody>
<tr>
<td>1.1 select and use personal protective equipment throughout activities. To include appropriate protection of:</td>
</tr>
<tr>
<td>a. eyes</td>
</tr>
<tr>
<td>b. ears</td>
</tr>
<tr>
<td>c. head</td>
</tr>
<tr>
<td>d. skin</td>
</tr>
<tr>
<td>e. feet</td>
</tr>
<tr>
<td>f. hands</td>
</tr>
</tbody>
</table>
1.2 select and use vehicle protective equipment throughout all activities.

<table>
<thead>
<tr>
<th>Learning outcome</th>
<th>The learner will:</th>
</tr>
</thead>
<tbody>
<tr>
<td>2</td>
<td>be able to carry out effective housekeeping practices in the automotive work environment</td>
</tr>
</tbody>
</table>

**Assessment criteria**

The learner can:
- 2.1 select and use cleaning equipment which is of the right type and suitable for the task
- 2.2 use utilities and appropriate consumables, avoiding waste
- 2.3 use materials and equipment to carry out cleaning and maintenance duties in allocated work areas, following automotive work environment policies, schedules and manufacturers’ instructions
- 2.4 perform housekeeping activities safely and in a way which minimizes inconvenience to customers and staff.
- 2.5 keep the work area clean and free from debris and waste materials
- 2.6 keep tools and equipment fit for purpose by regular cleaning and keeping tidy
- 2.7 dispose of used cleaning agents, waste materials and debris to comply with legal and workplace requirements.

<table>
<thead>
<tr>
<th>Learning outcome</th>
<th>The learner will:</th>
</tr>
</thead>
<tbody>
<tr>
<td>3</td>
<td>be able to recognise and deal with dangers in order to work safely within the automotive workplace</td>
</tr>
</tbody>
</table>

**Assessment criteria**

The learner can:
- 3.1 name and locate the responsible persons for health and safety in their relevant workplace
- 3.2 identify and report working practices and hazards which could be harmful to themselves or others
- 3.3 carry out safe working practices whilst working with equipment, materials and products in the automotive environment
- 3.4 rectify health and safety risks encountered at work, within the scope and capability of their job role.

<table>
<thead>
<tr>
<th>Learning outcome</th>
<th>The learner will:</th>
</tr>
</thead>
<tbody>
<tr>
<td>4</td>
<td>be able to conduct themselves responsibly</td>
</tr>
</tbody>
</table>

**Assessment criteria**

The learner can:
- 4.1 show personal conduct in the workplace which does not endanger the health and safety of themselves or others
- 4.2 display suitable personal presentation at work which ensures the health and safety of themselves and others at work.
Unit 001  Skills in health, safety and good housekeeping in the automotive environment

Assessment requirements
The assessment requirements are shown in full in the assessment documentation.
### Unit 003  
Skills in supporting job roles in the automotive work environment

Unit 003  
Skills in supporting job roles in the automotive work environment

Assessment requirements
The assessment requirements are shown in full in the assessment documentation.
Unit 004
Skills in materials, fabrication, tools and measuring devices in the automotive environment

UAN: Y/601/6279
Level: 2
Credit value: 7
GLH: 60
Relationship to NOS: This unit is linked to G4 Use of hand tools and equipment in motor vehicle engineering.
Assessment requirements specified by a sector or regulatory body: This unit was developed by the IMI, the sector skills council for the automotive retail industry. All assessments have been developed in accordance with the IMI Assessment Requirements for VRQs.

Aim: This unit helps the learner to develop the skills required for:
- the correct selection, care and use of key hand tools and measuring devices for modification, fabrication and repair in the automotive environment
- the correct preparation and use of common work environment equipment
- the correct selection and fabrication of materials used when modifying and repairing
- the correct application of automotive engineering fabrication and fitting principles.

<table>
<thead>
<tr>
<th>Learning outcome</th>
<th>The learner will:</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>be able to select, maintain and use hand tools and measuring devices in the automotive environment</td>
</tr>
</tbody>
</table>

Assessment criteria
The learner can:
1.1 select, maintain and use suitable hand tools safely when fabricating and fitting in the automotive workplace
1.2 select, maintain and use suitable measuring devices safely when fabricating and fitting in the automotive environment
1.3 select, maintain and use suitable PPE for fabrication, repair and fitting in the automotive environment
1.4 select, maintain and use suitable electrical measuring tools safely when repairing vehicles and components.
<table>
<thead>
<tr>
<th>Learning outcome</th>
<th>The learner will:</th>
</tr>
</thead>
<tbody>
<tr>
<td>2</td>
<td>be able to prepare and use common workshop equipment</td>
</tr>
</tbody>
</table>

**Assessment criteria**

The learner can:

<table>
<thead>
<tr>
<th>2.1</th>
<th>use suitably maintained workshop equipment safely</th>
</tr>
</thead>
<tbody>
<tr>
<td>2.2</td>
<td>use correct interpretation of ‘safe working load’ on lifting and supporting equipment</td>
</tr>
<tr>
<td>2.3</td>
<td>report any faulty or damaged tools and equipment to the relevant persons clearly and promptly</td>
</tr>
<tr>
<td>2.4</td>
<td>store work tools and equipment in a safe manner which permits ease of access and identification for use</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Learning outcome</th>
<th>The learner will:</th>
</tr>
</thead>
<tbody>
<tr>
<td>3</td>
<td>be able to select materials when fabricating, modifying and repairing vehicles and fitting components</td>
</tr>
</tbody>
</table>

**Assessment criteria**

The learner can:

| 3.1            | select and use appropriate materials whilst constructing, fitting, modifying or repairing vehicles and components |

<table>
<thead>
<tr>
<th>Learning outcome</th>
<th>The learner will:</th>
</tr>
</thead>
<tbody>
<tr>
<td>4</td>
<td>be able to apply automotive engineering, fabrication and fitting principles when modifying and repairing vehicles and components</td>
</tr>
</tbody>
</table>

**Assessment criteria**

The learner can:

<table>
<thead>
<tr>
<th>4.1</th>
<th>use correct procedures when:</th>
</tr>
</thead>
<tbody>
<tr>
<td>a. filing</td>
<td>b. tapping threads</td>
</tr>
<tr>
<td>c. cutting plastics and metals</td>
<td>d. drilling plastics and metals</td>
</tr>
<tr>
<td>e. fitting</td>
<td></td>
</tr>
<tr>
<td>4.2</td>
<td>use appropriate techniques when fabricating, repairing and modifying vehicles and components</td>
</tr>
<tr>
<td>4.3</td>
<td>select and use:</td>
</tr>
<tr>
<td>a. gaskets</td>
<td>b. seals</td>
</tr>
<tr>
<td>c. sealants</td>
<td>d. fittings and fasteners</td>
</tr>
<tr>
<td>4.4</td>
<td>apply modification and repair techniques to automotive electrical circuits</td>
</tr>
<tr>
<td>4.5</td>
<td>select and use locking, fixing and fastening devices.</td>
</tr>
</tbody>
</table>
Unit 004

Skills in materials, fabrication, tools and measuring devices in the automotive environment

Assessment requirements
The assessment requirements are shown in full in the assessment documentation.
Unit 008  
Skills to identify and agree motor vehicle customer service needs

<table>
<thead>
<tr>
<th>UAN:</th>
<th>M/601/6286</th>
</tr>
</thead>
<tbody>
<tr>
<td>Level:</td>
<td>3</td>
</tr>
<tr>
<td>Credit value:</td>

</tr>
<tr>
<td>GLH:</td>
<td>40</td>
</tr>
<tr>
<td>Relationship to NOS:</td>
<td>This unit is linked to G8 Identify and Agree the Motor Vehicle Customer Needs.</td>
</tr>
<tr>
<td>Assessment requirements specified by a sector or regulatory body:</td>
<td>This unit was developed by the IMI, the sector skills council for the automotive retail industry. All assessments have been developed in accordance with the IMI Assessment Requirements for VRQs.</td>
</tr>
<tr>
<td>Aim:</td>
<td>This unit is about the skills required to: gain information from customers on their perceived needs; give advice and information and agree a course of action; contract for the agreed work and complete all necessary records and instructions.</td>
</tr>
</tbody>
</table>

**Learning outcome** | **The learner will:**
--- | ---
1 | be able to obtain relevant information from the customer

**Assessment criteria**
The learner can:

1.1 obtain and interpret sufficient, relevant information, from the customer to make an assessment of their needs
1.2 clarify customer and vehicle needs by referring to vehicle data and operating procedures.

**Learning outcome** | **The learner will:**
--- | ---
2 | be able to provide relevant information to the customer

**Assessment criteria**
The learner can:

2.1 provide customers with accurate, current and relevant advice and information, in a form that the customer will understand
2.2 demonstrate techniques which encourage customers to ask questions and seek clarification during conversation.
<table>
<thead>
<tr>
<th>Learning outcome</th>
<th>The learner will:</th>
</tr>
</thead>
<tbody>
<tr>
<td>3</td>
<td>be able to agree work undertaken with the customer</td>
</tr>
</tbody>
</table>

**Assessment criteria**

The learner can:

3.1 summarise and record work agreed with the customer, before accepting the vehicle

3.2 implement confirmation of the agreement by ensuring customer understanding.

<table>
<thead>
<tr>
<th>Learning outcome</th>
<th>The learner will:</th>
</tr>
</thead>
<tbody>
<tr>
<td>4</td>
<td>be able to ensure recording systems are implemented correctly</td>
</tr>
</tbody>
</table>

**Assessment criteria**

The learner can:

4.1 use recording systems which are accurate and complete, in the required format and signed by the customer where necessary

4.2 perform the next stage in the process by passing on completed records to the correct person promptly

4.3 demonstrate correct procedures for customer approval where the contracted agreement is likely to be exceeded.
Unit 008  Skills to identify and agree motor vehicle customer service needs

Assessment requirements
The assessment requirements are shown in full in the assessment documentation.
Unit 051  Knowledge of health, safety and good housekeeping in the automotive environment

UAN: D/601/6171
Level: 2
Credit value: 3
GLH: 30
Relationship to NOS: This unit is linked to G1 Contribute to Housekeeping in Motor Vehicle Environment and G2 Reduce Risks to Health and Safety in the Motor Vehicle Environment.

Assessment requirements specified by a sector or regulatory body: This unit was developed by the IMI, the sector skills council for the automotive retail industry. All assessments have been developed in accordance with the IMI Assessment Requirements for VRQs.

Aim: This unit enables the learner to develop an understanding of:
- routine maintenance and cleaning of the automotive environment and using resources economically
- health and safety legislation and duties of everyone in the motor vehicle environment. It will provide an appreciation of significant risks in the automotive environment and how to identify and deal with them. Once completed the learner will be able to identify hazards and evaluate and reduce risk.

<table>
<thead>
<tr>
<th>Learning outcome</th>
<th>The learner will:</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>understand the correct personal and vehicle protective equipment to be used within the automotive environment</td>
</tr>
</tbody>
</table>

Assessment criteria

The learner can
1.1 explain the importance of wearing the types of PPE required for a range automotive repair activities
1.2 identify vehicle protective equipment for a range of repair activities
1.3 describe vehicle and personal safety considerations when working at the roadside.
<table>
<thead>
<tr>
<th>Learning outcome</th>
<th>The learner will:</th>
</tr>
</thead>
<tbody>
<tr>
<td>2</td>
<td>understand effective housekeeping practices in the automotive environment</td>
</tr>
</tbody>
</table>

**Assessment criteria**

The learner can

2.1 describe why the automotive environment should be properly cleaned and maintained
2.2 describe requirements and systems which may be put in place to ensure a clean automotive environment.
2.3 describe how to minimise waste when using utilities and consumables
2.4 state the procedures and precautions necessary when cleaning and maintaining an automotive environment
2.5 describe the selection and use of cleaning equipment when dealing with general cleaning, spillages and leaks in the automotive environment
2.6 describe procedures for correct disposal of waste materials from an automotive environment
2.7 describe procedures for starting and ending the working day which ensure effective housekeeping practices are followed.

<table>

Unit 051 Knowledge of health, safety and good housekeeping in the automotive environment

Supporting information

Candidates will be assessed on the assessment criteria as specified within the unit. The following information has been provided by IMI SSC and is included to support centres in terms of teaching and delivery.

Economic use of resources
a. Consumable materials eg grease, oils, split pins, locking and fastening devices etc.

Requirement to maintain work area effectively
a. Cleaning tools and equipment to maximise workplace efficiency.
b. Requirement to carry out the housekeeping activities safely and in a way that minimises inconvenience to customers and staff.
c. Risks involved when using solvents and detergents.
d. Advantages of good housekeeping.

Spillages, leaks and waste materials
a. Relevance of safe systems of work to the storage and disposal of waste materials.
b. Requirement to store and dispose of waste, used materials and debris correctly.
c. Safe disposal of special / hazardous waste materials.
d. Advantages of recycling waste materials.
e. Dealing with spillages and leaks.

Basic legislative requirements
a. Provision and Use of Work Equipment Regulations 1992
b. Provision and Use of Work Equipment Regulations 1998 as applied to power presses
c. Pressure Systems and Transportable Gas Containers Regulations 1989
d. Electricity at Work Regulations 1989
e. Noise at Work Regulations 1989
g. Health and Safety (Display Screen Equipment) Regulations 1992
h. Abrasive Wheels Regulations 1970
i. The Lifting Operations and Lifting Equipment Regulations 1998
   Work at Height Regulations 2005.
Routine maintenance of the workplace
a. Trainee's personal responsibilities and limits of their authority with regard to work equipment.
b. Risk assessment of the workplace activities and work equipment.
c. Workplace person responsible for training and maintenance of workplace equipment.
d. When and why safety equipment must be used.
e. Location of safety equipment.
f. Particular hazards associated with their work area and equipment.
g. Prohibited areas.
h. Plant and machinery that trainees must not use or operate.
i. Why and how faults on unsafe equipment should be reported.
j. Storing tools, equipment and products safely and appropriately.
k. Using the correct PPE.
l. Following manufacturers’ recommendations.
m. Location of routine maintenance information e.g. electrical safety check log.

Legislation relevant to Health and Safety
a. HASAWA
b. COSHH
c. EPA
e. PPE Regulations 1992.

General regulations to include an awareness of:
a. Health and Safety (Display Screen Equipment) Regulations 1992
b. Health and Safety (First Aid) Regulations 1981
c. Health and Safety (Safety Signs and Signals) Regulations 1996
d. Health and Safety (Consultation with Employees) Regulations 1996
f. Confined Spaces Regulations 1997
g. Noise at Work Regulations 1989
h. Electricity at Work Regulations 1989
i. Electricity (Safety) Regulations 1994
j. Fire Precautions Act 1971
k. Reporting of Injuries, Diseases and Dangerous Occurrences Regulations 1985
l. Pressure Systems Safety Regulations 2000
m. Waste Management 1991
n. Dangerous Substances and Explosive Atmospheres Regulations (DSEAR) 2002
o. Control of Asbestos at Work Regulations 2002.
**Legislative duties**

a. The purpose of a Health and Safety Policy.
b. The relevance of the Health and Safety Executive.
c. The relevance of an initial induction to Health and Safety requirements at your workplace.
d. General employee responsibilities under the HASAWA and the consequences of non-compliance.
e. General employer responsibilities under the HASAWA and the consequences of non-compliance.
f. The limits of authority with regard to Health and Safety within a personal job role.
g. Workplace procedure to be followed to report Health and Safety matters.

**Precautions to be taken when working with vehicles, workshop materials, tools and equipment including electrical safety, pneumatics and hydraulics**

a. Accessing and interpreting safety information.
b. Seeking advice when needed.
c. Seeking assistance when required.
d. Reporting of unsafe equipment.
e. Storing tools, equipment and products safely and appropriately.
f. Using the correct PPE.
g. Following manufacturers’ recommendations.
h. Following application procedures e.g. hazardous substances.
i. The correct selection and use of extraction equipment.

**PPE to include:**

a. Typical maintenance procedures for PPE equipment to include:
   i. typical maintenance log
   ii. cleaning procedures
   iii. filter maintenance
   iv. variation in glove types
   v. air quality checks.

b. Choice and fitting procedures for masks and air breathing equipment.

c. Typical workplace processes which would require the use of PPE to include:
   i. welding
   ii. sanding and grinding
   iii. filling
   iv. panel removal and replacement
   v. drilling
   vi. cutting
   vii. chiselling
   viii. removal of broken glass
   ix. removal of rubber seals from fire damaged vehicles
   x. removal of hypodermic needles
   xi. servicing activities
   xii. roadside recovery.

d. Unserviceable PPE.
e. PPE required for a range automotive repair activities. To include appropriate protection of:
   i. eyes
   ii. ears
   iii. head
   iv. skin
   v. feet
   vi. hands
   vii. lungs.

Fire and extinguishers
a. Classification of fire types.
b. Using a fire extinguisher effectively.
c. Types of extinguishers:
   i. foam
   ii. dry powder
   iii. CO2
   iv. water
   v. fire blanket.

Action to be taken in the event of a fire to include:
a. The procedure as:
   i. raise the alarm
   ii. fight fire only if appropriate
   iii. evacuate building
   iv. call for assistance.

Product warning labels to include:
a. Reasons for placing warning labels on containers.
b. Warning labels in common use
   i. toxic
   ii. corrosive
   iii. poisonous
   iv. harmful
   v. irritant
   vi. flammable
   vii. explosive.

Warning signs and notices
a. Colours used for warning signs:
   i. red
   ii. blue
   iii. green.
b. Shapes and meaning of warning signs:
   i. round
   ii. triangular
   iii. square.
c. The meaning of prohibitive warning signs in common use.
d. The meaning of mandatory warning signs in common use.
e. The meaning of warning notices in common use.
f. General design of safe place warning signs.
Hazards and risks to include:
  a. The difference between a risk and a hazard.
  b. Potential risks resulting from:
     i. the use and maintenance of machinery or equipment
     ii. the use of materials or substances
     iii. accidental breakages and spillages
     iv. unsafe behaviour
     v. working practices that do not conform to laid down policies
     vi. environmental factors
     vii. personal presentation
     viii. unauthorised personnel, customers, contractors etc entering
          the work premises
     ix. working by the roadside
     x. vehicle recovery.
  c. The employee’s responsibilities in identifying and reporting risks
     within their working environment.
  d. The method of reporting risks that is outside own limits of authority.
  e. Potential causes of:
     i. fire
     ii. explosion
     iii. noise
     iv. harmful fumes
     v. slips
     vi. trips
     vii. falling objects
     viii. accidents whilst dealing with broken down vehicles.

Personal responsibilities
  a. The purpose of workplace polices and procedures on:
     i. the use of safe working methods and equipment
     ii. the safe use of hazardous substances
     iii. smoking, eating, drinking and drugs
     iv. emergency procedures
     v. personal appearance.
  b. The importance of personal appearance in the control of health and
     safety.

Action to be taken in the event of colleagues suffering accidents
  a. The typical sequence of events following the discovery of an accident
     such as:
     i. make the area safe
     ii. remove hazards if appropriate i.e. switch off power
     iii. administer minor first aid
     iv. take appropriate action to re-assure the injured party
     v. raise the alarm
     vi. get help
     vii. report on the accident.
  b. Typical examples of first aid which can be administered by persons at
     the scene of an accident:
     i. check for consciousness
     ii. stem bleeding
iii. keep the injured person’s airways free
iv. place in the recovery position if injured person is unconscious
v. issue plasters for minor cuts
vi. action to prevent shock i.e. keep the injured party warm
vii. administer water for minor burns or chemical injuries
viii. wash eyes with water to remove dust or ingress of chemicals (battery acid)
ix. need to seek professional help for serious injuries.
c. Examples of bad practice which may result in further injury such as:
i. moving the injured party
ii. removing foreign objects from wounds or eyes
iii. inducing vomiting
iv. straightening deformed limbs.
Unit 053  Knowledge of support for job roles in the automotive work environment

<table>
<thead>
<tr>
<th>UAN:</th>
<th>T/601/6175</th>
</tr>
</thead>
<tbody>
<tr>
<td>Level:</td>
<td>3</td>
</tr>
<tr>
<td>Credit value:</td>
<td>3</td>
</tr>
<tr>
<td>GLH:</td>
<td>20</td>
</tr>
<tr>
<td>Relationship to NOS:</td>
<td>This unit is linked to G3 Maintain Working Relationships in the Motor Vehicle Environment.</td>
</tr>
<tr>
<td>Assessment requirements specified by a sector or regulatory body:</td>
<td>This unit was developed by the IMI, the sector skills council for the automotive retail industry. All assessments have been developed in accordance with the IMI Assessment Requirements for VRQs.</td>
</tr>
</tbody>
</table>

**Aim:**
This unit enables the learner to develop an understanding of how to keep good working relationships with all colleagues in the automotive work environment by using effective communication and support skills.

<table>
<thead>
<tr>
<th>Learning outcome</th>
<th>The learner will:</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>understand key organisational structures, functions and roles within the automotive work environment</td>
</tr>
</tbody>
</table>

**Assessment criteria**
The learner can:

| 1.1 | identify the purpose of the different sections of a typical automotive work environment |
| 1.2 | explain organisational structures and lines of communication within the automotive work environment |
| 1.3 | explain levels of responsibility within specific job roles in an automotive workplace. To include: |
|     | a. trainee |
|     | b. skilled technician |
|     | c. supervisor |
|     | d. manager. |

<table>
<thead>
<tr>
<th>Learning outcome</th>
<th>The learner will:</th>
</tr>
</thead>
<tbody>
<tr>
<td>2</td>
<td>understand the importance of obtaining, interpreting and using information in order to support their job role within the automotive work environment</td>
</tr>
</tbody>
</table>
**Assessment criteria**

The learner can:

2.1 explain the importance of different sources of information in an automotive work environment
2.2 explain how to find, interpret and use relevant sources of information
2.3 describe the main legal requirements relating to the vehicle, including road safety requirements
2.4 explain the importance of working to recognised procedures and processes
2.5 explain when replacement units and components must meet the manufacturers’ original equipment specification
2.6 explain the purpose of how to use identification codes.

<table>
<thead>
<tr>
<th>Learning outcome</th>
<th>The learner will:</th>
</tr>
</thead>
<tbody>
<tr>
<td>3</td>
<td>understand the importance of different types of communication within the automotive work environment</td>
</tr>
</tbody>
</table>

**Assessment criteria**

The learner can:

3.1 explain where different methods of communication would be used within the automotive environment
3.2 explain the factors which can determine their choice of communication
3.3 explain how the communication of information can change with the target audience to include informed and uninformed people.

<table>
<thead>
<tr>
<th>Learning outcome</th>
<th>The learner will:</th>
</tr>
</thead>
<tbody>
<tr>
<td>4</td>
<td>understand communication requirements when carrying out vehicle repairs in the automotive work environment</td>
</tr>
</tbody>
</table>

**Assessment criteria**

The learner can:

4.1 explain how to report using written and verbal communication
4.2 explain the importance of documenting information relating to work carried out in the automotive environment
4.3 explain the importance of working to agreed timescales.

<table>
<thead>
<tr>
<th>Learning outcome</th>
<th>The learner will:</th>
</tr>
</thead>
<tbody>
<tr>
<td>5</td>
<td>understand how to develop good working relationships with colleagues and customers in the automotive workplace</td>
</tr>
</tbody>
</table>

**Assessment criteria**

The learner can:

5.1 describe how to develop positive working relationships with colleagues and customers
5.2 explain the importance of developing positive working relationships
5.3 explain the importance of accepting other peoples’ views and opinions
5.4 explain the importance of making and honouring realistic commitments to colleagues and customers.
Unit 053 Knowledge of support for job roles in the automotive work environment

Supporting information

Candidates will be assessed on the assessment criteria as specified within the unit. The following information has been provided by IMI SSC and is included to support centres in terms of teaching and delivery.

The structure of a typical vehicle repair business
a. How these areas relate to each other within the business:
   i. body shop
   ii. vehicle repair workshop
   iii. paint shop
   iv. valeting
   v. vehicle parts store
   vi. main office
   vii. vehicle sales
   viii. reception.

Sources of information:
   a. other staff
   b. manuals
   c. parts lists
   d. computer software and the internet
   e. manufacturer
   f. diagnostic equipment.

Communication requirements when carrying out vehicle repairs
a. Locating and using correct documentation and information for:
   i. recording vehicle maintenance and repairs
   ii. vehicle specifications
   iii. component specifications
   iv. oil and fluid specifications
   v. equipment and tools
   vi. identification codes.

b. Procedures for:
   i. referral of problems
   ii. reporting delays
   iii. additional work identified during repair or maintenance
   iv. keeping others informed of progress.

c. Methods of communication:
   i. verbal
   ii. signs and notices
   iii. memos
   iv. telephone
v. electronic mail
vi. vehicle job card
vii. notice boards
viii. SMS text messaging
ix. letters.

d. Organisational and customer requirements:
i. importance of time scales to customer and organization
ii. relationship between time and costs
iii. meaning of profit.

e. Choice of communication
i. distance
ii. location
iii. job responsibility.

f. Importance of maintaining positive working relationships:
i. morale
ii. productivity
iii. company image
iv. customer relationships
v. colleagues.
Unit 054  Knowledge of materials, fabrication, tools and measuring devices in the automotive environment

UAN: K/601/6237
Level: 2
Credit value: 4
GLH: 40
Relationship to NOS: This unit is linked to G4 Use of hand tools and equipment in Motor Vehicle Engineering.
Assessment requirements specified by a sector or regulatory body: This unit was developed by the IMI, the sector skills council for the automotive retail industry. All assessments have been developed in accordance with the IMI Assessment Requirements for VRQs.

Aim: This unit enables the learner to develop an understanding of:
- the correct selection, care and use of key hand tools and measuring devices for modification, fabrication and repair in the automotive environment
- the correct preparation and use of common work environment equipment
- the correct selection and fabrication of materials used when modifying and repairing
- the correct application of automotive engineering fabrication and fitting principles.

<table>
<thead>
<tr>
<th>Learning outcome</th>
<th>The learner will:</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>understand how to select, use and care for hand tools and measuring devices in the automotive environment</td>
</tr>
</tbody>
</table>

Assessment criteria

The learner can:
1.1 identify and explain the use of common types of hand tools used for fabricating and fitting in the automotive environment
1.2 identify and explain the use of common measuring devices used for fabrication and fitting in the automotive environment
1.3 describe, within the scope of their responsibilities, how to select, prepare and maintain hand tools, measuring devices and PPE used for fabrication, repair and fitting in the automotive environment
1.4 state the limitations of common hand tools and measuring devices
<table>

<td></td>
</tr>
<tr>
<td>4.1</td>
<td>describe how to tap threads, file, cut and drill plastics and metals when modifying or repairing vehicles</td>
</tr>
<tr>
<td>4.2</td>
<td>describe how to measure, mark out, shape and join materials when fabricating</td>
</tr>
</tbody>
</table>
| 4.3 | describe the selection and fitting procedures of the following:  
  a. gaskets and seals  
  b. sealants and adhesives  
  c. fittings and fasteners  
  d. electrical circuit components |
| 4.4 | identify locking, fastening and fixing devices |
| 4.5 | state the importance of current operating specifications for limits, fits and tolerances in the automotive environment. |
Unit 054 Knowledge of materials, fabrication, tools and measuring devices in the automotive environment

Supporting information

Candidates will be assessed on the assessment criteria as specified within the unit. The following information has been provided by IMI SSC and is included to support centres in terms of teaching and delivery.

Common types of hand tools used for fabricating and fitting in the automotive workplace to include:

a. files
b. hacksaws and snips
c. hammers
d. screwdrivers
e. pliers
f. spanners
g. sockets
h. punches
i. types of drill and drill bits
j. taps and dies
k. stud removers
l. marking out tools.

Common measuring devices used for fabrication and fitting in the automotive environment. To include:

a. rule or tape
b. callipers
c. feeler gauge
d. volume measures
e. micrometer
f. dial gauges
g. torque wrenches
h. depth gauges

Common electrical measuring tools used in the repair of vehicles and components. To include:

a. ammeter
b. voltmeter
c. ohmmeter
d. multi-meter.

Common electrical terms when measuring:
a. voltage
b. current
c. resistance.

**Workshop equipment (including appropriate PPE)** to include:
- hydraulic jacks
- axle stands
- pillar drills
- air tools
- vehicle lifts
- cranes
- hoists
- electrical power tools.

**The properties, application and limitations to include safe use of ferrous and non-ferrous metals used when constructing, modifying and repairing vehicles and components.**

Materials to include:
- carbon steels
- alloy steels
- cast iron
- aluminium alloys
- brass
- copper
- lead.

**Properties, application and limitations (to include safe use) of non-metallic materials used when constructing, modifying and repairing vehicles and components.** Materials to include:
- glass
- plastics (inc. GRP)
- Kevlar
- rubber.

**Terms relating to the properties of materials** to include:
- hardness
- toughness
- ductility
- elasticity
- tenacity
- malleability
- plasticity.
## Unit 058

### Knowledge of how to identify and agree motor vehicle customer service needs

<table>
<thead>
<tr>
<th>UAN:</th>
<th>R/601/6247</th>
</tr>
</thead>
<tbody>
<tr>
<td>Level:</td>
<td>3</td>
</tr>
<tr>
<td>Credit value:</td>
<td>5</td>
</tr>
<tr>
<td>GLH:</td>
<td>45</td>
</tr>
<tr>
<td>Relationship to NOS:</td>
<td>This unit is linked to G8 Identify and Agree the Motor Vehicle Customer Needs.</td>
</tr>
</tbody>
</table>

### Assessment requirements specified by a sector or regulatory body:

This unit was developed by the IMI, the sector skills council for the automotive retail industry. All assessments have been developed in accordance with the IMI Assessment Requirements for VRQs.

### Aim:

This unit enables the learner to develop an understanding of how to gain information from customers on their perceived needs; give advice and information and agree a course of action; contract for the agreed work and complete all necessary records and instructions.

### Learning outcome

<table>
<thead>
<tr>
<th>The learner will:</th>
</tr>
</thead>
<tbody>
<tr>
<td>1. understand legislative and organisational requirements and procedures</td>
</tr>
</tbody>
</table>

### Assessment criteria

The learner can:

1. describe the fundamental legal requirements of current consumer legislation and the consequences of their own actions in respect of this legislation
2. describe the content and limitations of company and product warranties for the vehicles dealt with by their company
3. explain the limits of their own authority for accepting vehicles
4. explain the importance of keeping customers informed of progress
5. describe their workplace requirements for the completion of records
6. explain how to complete and process all the necessary documentation.
<table>
<thead>
<tr>
<th>Learning outcome</th>
<th>The learner will:</th>
</tr>
</thead>
<tbody>
<tr>
<td>2. understand how to communicate and care for customers</td>
<td></td>
</tr>
</tbody>
</table>

**Assessment criteria**

The learner can:

2.1 explain how to communicate effectively with customers
2.2 describe how to adapt their language when explaining technical matters to non-technical customers
2.3 explain how to use effective questioning techniques
2.4 describe how to care for customers and achieve customer satisfaction.

<table>
<thead>
<tr>
<th>Learning outcome</th>
<th>The learner will:</th>
</tr>
</thead>
<tbody>
<tr>
<td>3. understand company products and services</td>
<td></td>
</tr>
</tbody>
</table>

**Assessment criteria**

The learner can:

3.1 describe the range of options available to resolve vehicle problems
3.2 describe the range and type of services offered by their company
3.3 explain the effect of resource availability upon the receipt of customer vehicles and the completion work
3.4 explain how to access costing and work completion time information.
Unit 058 Knowledge of how to identify and agree motor vehicle customer service needs

Supporting information

Candidates will be assessed on the assessment criteria as specified within the unit. The following information has been provided by IMI SSC and is included to support centres in terms of teaching and delivery.

Organisational requirements
a. Explain the organisation’s terms and conditions applicable to the acceptance of customer vehicles.
b. Explain the content and limitations of vehicle and component warranties for the vehicles dealt with by your organisation.
c. Detail what, if any, limits there are to the authority for accepting vehicles.
d. Detail why it is important to keep customers advised of progress and how this is achieved within the organisation.
e. Detail the organisation’s procedures for the completion and processing of documentation and records, including payment methods and obtaining customer signatures as applicable.

Principles of customer communication and care
a. First Impressions.
b. Listening skills – 80:20 ratio.
c. Eye contact and smiling.
d. Showing interest and concern.
e. Questioning techniques and customer qualification.
f. Giving clear non-technical explanations.
g. Confirming understanding (statement/question technique, reflective summary).
h. Written communication – purpose, content, presentation and style.
i. Providing a high quality service – fulfilling (ideally exceeding) customer expectations within agreed time frames.
j. Obtaining customer feedback and corrective actions when dissatisfaction expressed.
k. Dealing with complaints.

Company products and services
a. Service standards
   i. national
   ii. manufacturer
   iii. organisational.
b. The range and type of services offered by the organisation.
   i. diagnostic
   ii. servicing
iii. repair
iv. warranty
v. MOT testing
vi. fitment of accessories/enhancements
vii. internal.

c. The courses of action available to resolve customer problems:
   i. the extent and nature of the work to be undertaken
   ii. the terms and conditions of acceptance
   iii. the cost
   iv. the timescale
   v. required payment methods.
d. The effect of resource availability upon the receipt of customer vehicles and the completion of work:
   i. levels and availability of equipment
   ii. levels and availability of technicians
   iii. workshop loading systems.
e. How to access costing and work completion time information:
   i. manuals
   ii. computer based.

Vehicle information systems, servicing and repair requirements
a. Accessing technical data including diagnostics.
b. Servicing to manufacturer requirements/standards.
c. Repair/operating procedures.
d. MOT standards/requirements.
e. Quality controls – interim and final.
f. Requirements for cleanliness of vehicle on return to customer.
g. Handover procedures.

Consumer legislation to include:
a. consumer protection
b. sale of goods
c. data protection
d. product liability
e. health and safety
f. discrimination.
## Unit 101

**Skills in routine light vehicle maintenance**

<table>
<thead>
<tr>
<th><strong>UAN:</strong></th>

<th>The learner will:</th>
</tr>
</thead>
<tbody>
<tr>
<td>4</td>
<td>be able to carry out removal and replacement of light vehicle electrical units and components.</td>
</tr>
</tbody>
</table>

**Assessment criteria**

The learner can

4.1 remove and replace the motor vehicle’s electrical systems and components, adhering to the specifications and tolerances for the vehicle and following:
   a. the manufacturer’s approved removal and replacement methods
   b. recognised researched repair methods
   c. health and safety requirements

4.2 ensure that replacement motor vehicle electrical units and components conform to the vehicle operating specification and any legal requirements

4.3 use suitable testing methods to evaluate the performance of the reassembled system

4.4 ensure that the reassembled motor vehicle electrical systems perform to the vehicle operating specification and meet any legal requirements.

Assessment criteria
The learner can
2.1 select suitable sources of technical information to support light vehicle chassis unit and component removal and replacement activities including:
   a. vehicle technical data
   b. removal and replacement procedures
### Learning outcome | The learner will:
--- | ---
3 | be able to use appropriate tools and equipment

#### Assessment criteria

The learner can

3.1 select the appropriate tools and equipment necessary for removal and replacement of light vehicle chassis systems including:
   - steering
   - suspension
   - braking
   - wheels and tyres

3.2 ensure that equipment has been calibrated to meet manufacturers’ and legal requirements

3.3 use the correct tools and equipment in the way specified by manufacturers to remove and replace light vehicle chassis systems.

### Learning outcome | The learner will:
--- | ---
4 | be able to carry out removal and replacement of light vehicle chassis units and components

#### Assessment criteria

The learner can

4.1 remove and replace the light vehicle’s chassis systems and components, adhering to the correct specifications and tolerances for the vehicle and following:
   - the manufacturer’s approved removal and replacement methods
   - recognised researched repair methods
   - health and safety requirements.

4.2 ensure that replacement light vehicle chassis units and components conform to the vehicle operating specification and any legal requirements

4.3 use suitable testing methods to evaluate the performance of the reassembled system

4.4 ensure that the reassembled light vehicle chassis system performs to the vehicle operating specification and meets any legal requirements.

### Learning outcome | The learner will:
--- | ---
5 | be able to record information and make suitable recommendations

#### Assessment criteria

The learner can

5.1 produce work records that are accurate, complete and passed to the relevant person(s) promptly in the format required

5.2 make suitable and justifiable recommendations for cost effective repairs

5.3 record and report any additional faults noticed during the course of their work promptly in the format required.

### Assessment criteria

The learner can:

5.1 produce work records that are accurate, complete and passed to the relevant person(s) promptly in the format required

5.2 make suitable and justifiable recommendations for cost effective repairs

5.3 record and report any additional faults noticed during the course of their work promptly in the format required.
Unit 131  Skills in overhauling light vehicle steering and suspension units

Assessment requirements
The assessment requirements are shown in full in the assessment documentation.
Unit 151  Knowledge of routine light vehicle maintenance

UAN: F/601/3716
Level: 2
Credit value: 3
GLH: 20
Relationship to NOS: This unit is linked to LV01 Carry Out Routine Light Vehicle Maintenance.

Assessment requirements specified by a sector or regulatory body: This unit was developed by the IMI, the sector skills council for the automotive retail industry. All assessments have been developed in accordance with the IMI Assessment Requirements for VRQs.

Aim: This unit enables the learner to develop an understanding of conducting routine maintenance, adjustment and replacement activities as part of the periodic servicing of light vehicles.

<table>
<thead>
<tr>
<th>Learning outcome</th>
<th>The learner will:</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>Understand how to carry out routine light vehicle maintenance</td>
</tr>
</tbody>
</table>

Assessment criteria

The learner can:
1.1 explain how to conduct a scheduled light vehicle routine examination and assessment against the vehicle manufacturer’s specification
1.2 identify the assessment methods used to check for conformity
1.3 Identify the different systems to be inspected while carrying out light vehicle routine maintenance
   a. engine
   b. chassis
   c. wheels and tyres
   d. transmission and driveline
   e. electrical and electronic
   f. exterior vehicle body
   g. vehicle interior
1.4 describe the procedures used for checking the condition and serviceability of light vehicle units and components
1.5 describe the procedures for checking and replenishing fluid levels
1.6 describe the procedures for checking and replacing lubricants and fluids
1.7 identify adjustments that need to be carried out on a light vehicle routine maintenance
1.8 explain the procedure for reporting cosmetic damage to vehicle components and units outside normal service items
1.9 identify the operating specifications for the systems being checked while carrying out light vehicle routine maintenance.

<table>
<thead>
<tr>
<th>Learning outcome</th>
<th>The learner will:</th>
</tr>
</thead>
<tbody>
<tr>
<td>2</td>
<td>Understand the importance of carrying out light vehicle maintenance</td>
</tr>
</tbody>
</table>

**Assessment criteria**

The learner can:

2.1 describe the requirements of correct maintenance in order to maintain the vehicle in a roadworthy and legal condition
2.2 describe the importance of correct maintenance for warranty purposes.
Unit 151  Knowledge of routine light vehicle maintenance

Supporting information

Candidates will be assessed on the assessment criteria as specified within the unit. The following information has been provided by IMI SSC and is included to support centres in terms of teaching and delivery.

a. Vehicle maintenance, inspection and adjustment and record finding.

b. Vehicle inspection techniques used in routine maintenance including:
   i. aural
   ii. visual and functional assessments on engine
   iii. engine systems
   iv. chassis systems
   v. wheels and tyres
   vi. transmission system
   vii. electrical and electronic systems
   viii. exterior vehicle body
   ix. vehicle interior.

c. The procedures used for inspecting the condition and serviceability of the following:
   i. filters
   ii. drive belts
   iii. wiper blades
   iv. brake linings
   v. pads
   vi. tyres
   vii. lights.

d. Preparation and appropriate use of equipment to include:
   i. test instruments
   ii. emission equipment
   iii. wheel alignment
   iv. beam setting equipment
   v. tyre tread depth gauges.

e. Procedures for checking and replenishing fluid levels:
   i. oil
   ii. water
   iii. hydraulic fluids.

f. Procedures for checking and replacement of lubricants:
   i. replace oil filters
   ii. check levels
   iii. types of oil
   iv. cleanliness
   v. disposal of old oil and filters.

g. Procedures for carrying out adjustments on vehicle systems or components:
   i. clearances
   ii. settings
   iii. alignment
   iv. operational performance (engine idle, exhaust gas).
h. Procedures for checking electrical systems:
   i. operation
   ii. security
   iii. performance.

   i. Importance and process of detailed inspection procedures:
      i. following inspection checklists
      ii. checking conformity to manufacturer’s specifications
      iii. UK and European legal requirements.

j. Importance and process of completing all relevant documentation relating to routine maintenance:
   i. inspection records
   ii. job cards
   iii. vehicle repair records
   iv. in-vehicle service history.

k. The need to use vehicle protection prior to repair.Requirements and methods used for protecting:
   i. vehicle body panels
   ii. paint surfaces
   iii. seats
   iv. carpets and floor mats.

l. The need to check the vehicle following routine maintenance.

m. The need to inspect the vehicle following routine maintenance:
   i. professional presentation of vehicle
   ii. customer perceptions.

n. The checks of vehicle following routine maintenance:
   i. removal of oil and grease marks
   ii. body panels
   iii. paint surfaces
   iv. seats
   v. carpets and floor mats
   vi. re-instatement of components.
Unit 152

The learner can

1.1 identify light vehicle engine mechanical system components

1.2 describe the construction and operation of light vehicle engine mechanical systems
   a. four stroke
   b. spark ignition
   c. compression ignition
   d. rotary

1.2 compare key light vehicle engine mechanical system components and assemblies against alternatives to identify differences in construction and operation

1.3 identify the key engineering principles that are related to light vehicle engine mechanical systems
   a. compression ratios
   b. cylinder capacity
   c. power
Learning outcome | The learner will:
--- | ---
2 | understand how light vehicle engine lubrication systems operate

**Assessment criteria**
The learner can
2.1 | identify light vehicle engine lubrication system components
2.2 | describe the construction and operation of light vehicle engine lubrication components and systems
   a. full flow
   b. by pass
   c. wet sump
   d. dry sump
2.3 | compare key light vehicle engine lubrication system components and assemblies to identify differences in construction and operation
2.4 | identify the key engineering principles that are related to light vehicle engine lubrication systems
   a. classification of lubricants
   b. properties of lubricants
   c. methods of reducing friction
2.5 | state common terms used in light vehicle engine lubrication system design.

Learning outcome | The learner will:
--- | ---
3 | understand how light vehicle engine cooling, heating and ventilation systems operate

**Assessment criteria**
The learner can
3.1 | identify light vehicle engine cooling, heating and ventilation system components
3.2 | describe the construction and operation of light vehicle engine cooling, heating and ventilation systems
3.3 | compare key light vehicle engine cooling, heating and ventilation system components and assemblies against alternatives to identify differences in construction and operation
3.4 | identify the key engineering principles that are related to light vehicle engine cooling, heating and ventilation systems
   a. heat transfer
   b. linear and cubical expansion
   c. specific heat capacity
   d. boiling point of liquids
3.5 | state common terms used in key light vehicle engine cooling, heating and ventilation system design.

**Assessment criteria**

The learner can

4.1 describe how to remove and replace engine mechanical, lubrication and cooling system units and components

4.2 describe common types of testing methods used to check the operation of engine mechanical, lubrication and cooling systems and their purpose

4.3 describe how to test and evaluate the performance of replacement units against vehicle specification

4.4 identify common faults found in light vehicle engine mechanical, lubrication and cooling systems and their causes.
Unit 152  Knowledge of light vehicle engine mechanical, lubrication and cooling system units and components

Supporting information

Candidates will be assessed on the assessment criteria as specified within the unit. The following information has been provided by IMI SSC and is included to support centres in terms of teaching and delivery.

Engines
a. Engine types and configurations:
   i. inline
   ii. flat
   iii. vee
   iv. four-stroke cycle and two-stroke cycle for spark ignition and compression ignition engines
   v. naturally aspirated and turbo-charged engines
   vi. hybrid fuel engines.
b. Relative advantages and disadvantages of different engine types and configurations.
c. Engine components and layouts:
   i. single (OHC) and multi camshaft (DOHC)
   ii. single and multi cylinder (2, 4, 6, 8 cylinder types).
d. Cylinder head layout and design, combustion chamber and piston design.
e. Calculate compression ratios from given data.
f. The procedures used when inspecting engines.
g. The procedures to assess:
   i. serviceability
   ii. wear
   iii. condition
   iv. clearances
   v. settings
   vi. linkages
   vii. joints
   viii. fluid systems
   ix. adjustments
   x. operation and functionality
   xi. security.
h. Symptoms and faults associated with mechanical engine operation:
   i. poor performance
   ii. abnormal or excessive mechanical noise
   iii. erratic running
iv. low power
v. exhaust emissions
vi. abnormal exhaust smoke
vii. unable to start
viii. exhaust gas leaks to cooling system
ix. exhaust gas leaks.

Lubrication
a. The advantages and disadvantages of wet and dry systems.
b. Engine lubrication system:
   i. splash and pressurised systems
   ii. pumps
   iii. pressure relief valve
   iv. filters
   v. oil ways
   vi. oil coolers.
c. Terms associated with lubrication and engine oil:
   i. full-flow
   ii. hydrodynamic
   iii. boundary
   iv. viscosity
   v. multi-grade
   vi. natural and synthetic oil
   vii. viscosity index
   viii. multi-grade.
d. The requirements and features of engine oil:
   i. operating temperatures
   ii. pressures
   iii. lubricant grades
   iv. viscosity
   v. multi-grade oil
   vi. additives
   vii. detergents
   viii. dispersants
   ix. anti-oxidants inhibitors
   x. anti-foaming agents
   xi. anti-wear
   xii. synthetic oils
   xiii. organic oils
   xiv. mineral oils.
e. Symptoms and faults associated with lubrication systems:
   i. excessive oil consumption
   ii. oil leaks
   iii. oil in water
   iv. low or excessive pressure
   v. oil contamination.
f. The procedures used when inspecting lubrication system.

Cooling, Heating and Ventilation
a. The components, operating principles, and functions of engine cooling systems.

b. Procedures used to remove, replace and adjust cooling system components:
   i. cooling fans and control devices
   ii. header tanks, radiators and pressure caps
   iii. heater matrices and temperature control systems
   iv. expansion tanks hoses, clips and pipes
   v. thermostats impellers and coolant
   vi. ventilation systems.

c. The preparation and method of use of appropriate specialist equipment used to evaluate system performance following component replacement.
   i. system pressure testers
   ii. pressure cap testers
   iii. hydrometer, or anti-freeze testing equipment
   iv. chemical tests for the detection of combustion gas.

d. The layout and construction of internal heater systems.

e. The controls and connections within internal heater system.

f. Symptoms and faults associated with cooling systems:
   i. water leaks
   ii. water in oil
   iii. internal heating system: efficiency, operation, leaks, controls, air filtration, air leaks and contamination
   iv. excessively low or high coolant temperature.

g. The procedures used when inspecting:
   i. internal heating system
   ii. cooling system.

General
a. The preparation, testing and use of tools and equipment used for:
   i. dismantling
   ii. removal and replacement of engine units and components.

b. Appropriate safety precautions:
   i. PPE
   ii. vehicle protection when dismantling
   iii. removal and replacing engine units and components.

c. The importance of logical and systematic processes.

d. The inspection and testing of engine units and components.

e. The preparation of replacement units for re-fitting or replacement.

f. The reasons why replacement components and units must meet the original specifications (OES) – warranty requirements, to maintain performance and safety requirements.

g. Refitting procedures.

h. The inspection and testing of units and system to ensure compliance with manufacturer’s, legal and performance requirements.

i. The inspection and re-instatement of the vehicle following repair to ensure customer satisfaction:
   i. cleanliness of vehicle interior and exterior
   ii. security of components and fittings
   iii. re-instatement of components and fittings.

Unit 153 Knowledge of removing and replacing light vehicle electrical units and components

Supporting information

Candidates will be assessed on the assessment criteria as specified within the unit. The following information has been provided by IMI SSC and is included to support centres in terms of teaching and delivery.

Electrical/electronic principles

a. Electrical units:
   i. volt (electrical pressure)
   ii. ampere (electrical current)
   iii. ohm (electrical resistance)
   iv. watt (power).

b. The requirements for an electrical circuit:
   i. battery
   ii. cables
   iii. switch
   iv. current consuming device
   v. continuity.

c. The direction of current flow and electron flow.

d. Series and parallel circuits to include:
   i. current flow
   ii. voltage of components
   iii. volt drop
   iv. resistance.
   v. the effect on circuit operation of open circuit component(s).

e. Earth and insulated return systems.

f. Cable sizes and colour codes.

g. Different types of connectors, terminals and circuit protection devices.

h. Common electrical and electronic symbols.
   i. The meaning of:
      i. short circuit
      ii. open circuit
      iii. bad earth
      iv. high resistance
      v. electrical capacity.

j. The principles of vehicle electronic systems and components.

k. Interpret vehicle wiring diagrams to include:
   i. vehicle lighting
   ii. auxiliary circuits
iii. indicators
iv. starting and charging systems.

I. Function and construction of electrical components including:
i. circuit relays
ii. bulb types
iii. fan and heater
iv. circuit protection.

m. The safety precautions when working on electrical and electronic systems to include:
i. disconnection and connection of battery
ii. avoidance of short circuits
iii. power surges
iv. prevention of electric shock
v. protection of electrical and electronic components
vi. protection of circuits from overload or damage.

n. The set-up and use of:
i. digital and analogue multi-meters
ii. voltmeter
iii. ammeter
iv. ohmmeter
v. oscilloscope
vi. manufacturer’s dedicated test equipment.

o. Electrical and electronic checks for electrical and electronic systems to include:
i. connections
ii. security
iii. functionality
iv. performance to specifications
v. continuity, open circuit
vi. short circuit
vii. high resistance
viii. volt drop
ix. current consumption
x. output patterns (oscilloscope).

p. Symptoms and faults associated with electrical and electronic systems to include:
i. high resistance
ii. loose and corroded connections
iii. short circuit
iv. excessive current consumption
v. open circuit
vi. malfunction
vii. poor performance
viii. battery faults to include flat battery
ix. failure to hold charge
x. low state of charge
xi. overheating
xii. poor starting.

Battery and charging
a. The construction and operation of vehicle batteries including:
   i. low maintenance and maintenance free
   ii. lead acid and nickel cadmium types
   iii. cells
   iv. separators
   v. plates
   vi. electrolyte.

b. The operation of the vehicle charging system:
   i. alternator
   ii. rotor
   iii. stator
   iv. slip ring
   v. brush assembly
   vi. three phase output
   vii. diode rectification pack
   viii. voltage regulation
   ix. phased winding connections
   x. cooling fan
   xi. alternator drive system.

Starting
a. The layout, construction and operation of engine starting systems:
   inertia and pre-engaged principles.
b. The function and operation of the following components:
   i. inertia and pre-engaged starter motor
   ii. starter ring gear
   iii. pinion
   iv. starter solenoid
   v. ignition/starter switch
   vi. starter relay (if appropriate)
   vii. one-way clutch (pre-engaged starter motor).

Lighting
a. Function and construction of electrical components including:
   i. front and tail lamps
   ii. main and dip beam headlamps
   iii. fog and spot lamps
   iv. lighting and dip switch
   v. directional indicators.
b. The circuit diagram and operation of components for:
   i. side and tail lamps
   ii. headlamps
   iii. interior lamps
   iv. fog and spot lamps
   v. direction indicators.
c. The statutory requirements for vehicle lighting when using a vehicle
   on the road.
d. Headlamp adjustment and beam setting.

Auxiliary systems
a. Function and construction of electrical components including:
   i. central door locking
   ii. anti theft devices
   iii. manual locking and dead lock systems
   iv. window winding
   v. demisting systems
   vi. door mirror operation mechanisms
   vii. interior lights and switching
   viii. sun roof operation.

b. The circuit diagram and operation of components for:
   i. central door locking
   ii. anti theft devices
   iii. manual locking and dead lock systems
   iv. window winding
   v. demisting systems
   vi. door mirror operation mechanisms
   vii. sun roof operation.

c. Comfort and convenience systems to include:
   i. heated seats
   ii. electrically adjusted seats
   iii. heated screens
   iv. electric mirrors
   v. heating
   vi. climate control
   vii. air conditioning.

General

a. The preparation, testing and use of:
   i. tools and equipment
   ii. electrical meters and equipment used for dismantling
   iii. removal and replacement of electrical and electronic systems
   and components.

b. Appropriate safety precautions:
   i. PPE
   ii. vehicle protection when dismantling
   iii. removal of and replacing electrical and electronic components
   and systems.

c. The importance of logical and systematic processes.

d. Preparation of replacement units for re-fitting or replacement
   electrical and electronic components and systems.

e. The reasons why replacement components and units must meet the
   original specifications (OES) – warranty requirements, to maintain
   performance, safety requirements.

f. Refitting procedures.

g. The inspection and testing of units and systems to ensure compliance
   with manufacturer’s, legal and performance requirements.

h. Inspection and re-instatement of the vehicle following repair to
   ensure:
   i. customer satisfaction
   ii. cleanliness of vehicle interior and exterior
   iii. security of components and fittings
iv. re-instatement of components and fittings.
Unit 154  Knowledge in removing and replacing light vehicle chassis units and components

UAN: A/601/3732
Level: 2
Credit value: 6
GLH: 45
Relationship to NOS: This unit is linked to LV04 Remove and Replace Light Vehicle Chassis Units and Components.

Assessment requirements specified by a sector or regulatory body: This unit was developed by the IMI, the sector skills council for the automotive retail industry. All assessments have been developed in accordance with the IMI Assessment Requirements for VRQs.

Aim: This unit enables the learner to develop an understanding of the construction and operation of common steering, suspension and braking systems (including wheels and tyres). It also covers the procedures involved in the removal and replacement of system components and the evaluation of their performance.

Unit 154  Knowledge of removing and replacing light vehicle chassis units and components

Supporting information

Candidates will be assessed on the assessment criteria as specified within the unit. The following information has been provided by IMI SSC and is included to support centres in terms of teaching and delivery.

Steering
a. The action and purpose of steering geometry:
   i. castor angle
   ii. camber angle
   iii. kingpin or swivel pin inclination
   iv. negative offset
   v. wheel alignment (tracking) (toe in and toe out)
   vi. toe out on turns
   vii. steered wheel geometry.
b. The following terms associated with steering:
   i. Ackerman principle
   ii. slip angles
   iii. self-aligning torque oversteer and understeer
   iv. neutral steer.
c. The components and layout of hydraulic power steering systems:
   i. piston and power cylinders
   ii. drive belts and pumps
   iii. hydraulic valve (rotary, spool and flapper type)
   iv. hydraulic fluid.
d. The advantages of power assisted steering.
e. The operation of hydraulic power steering.
f. The principles of electronic power steering systems.
g. The procedures used for inspecting the serviceability and condition of:
   i. manual steering
   ii. power steering.
h. Steering system defects to include:
   i. uneven tyre wear
   ii. wear on outer edge of tyre
   iii. wear on inner edge of tyre
   iv. uneven wear
   v. flats on tread
   vi. steering vibrations
   v. wear in linkage
   vi. damage linkage
vii. incorrect wheel alignment  
viii. incorrect steering geometry.
Suspension

a. The layout and components of suspension systems:
   i. non-independent suspensions
   ii. independent front suspension (IFS)
   iii. independent rear suspension (IRS)
   iv. hydraulic
   v. hydro-pneumatic
   vi. rigid axle types.

b. The operation of suspension systems and components:
   i. leaf and coil springs
   ii. torsion bar
   iii. rubber springs
   iv. Macpherson strut system
   v. hydraulic
   vi. hydro-pneumatic
   vii. hydraulic dampers
   viii. trailing arms
   ix. wish bones
   x. ball joints
   xi. track control arms
   xii. bump stops
   xiii. anti-roll bars
   xiv. stabiliser bars
   xv. swinging arms
   xvi. parallel link
   xvii. swinging half-axles
   xviii. transverse link
   xix. semi-swinging arms.

c. The advantages of different systems including:
   i. non-independent
   ii. independent suspension (IFS)
   iii. independent suspension (IRS)
   iv. hydraulic
   v. hydro-pneumatic
   vi. rigid axle.

d. The principles of electronic suspensions systems.

e. The forces acting on suspension systems during braking, driving and cornering.

f. The methods of locating the road wheels against braking, driving and cornering forces.

g. The methods of controlling cornering forces by fitting anti-roll torsion members.

h. Suspension terms:
   i. rebound
   ii. bump
   iii. float
   iv. dive
   v. pitch
   vi. roll
   vii. compliance.
i. The procedures used for inspecting the serviceability and condition of the suspension system

j. Suspension system defects:
   i. wheel hop
   ii. ride height (unequal and low)
   iii. wear
   iv. noises under operation
   v. fluid leakage
   vi. excessive travel
   vii. excessive tyre wear
   viii. bounce
   ix. poor vehicle handling
   x. worn dampers
   xi. worn joints
   xii. damaged linkages.

**Brakes**

a. The construction and operation of drum brakes:
   i. leading and trailing shoe construction
   ii. self-servo action
   iii. automatic adjusters
   iv. backing plates
   v. parking brake system.

b. The construction and operation of disc brakes:
   i. disc pads
   ii. calliper
   iii. brake disc
   iv. ventilated disc
   v. disc pad retraction
   vi. parking brake system
   vii. electrical and electronic components
   viii. wear indicators and warning lamps.

c. The construction and operation of the hydraulic braking system:
   i. single and dual line layout
   ii. master cylinders
   iii. wheel cylinders
   iv. disc brake calliper and pistons
   v. brake pipe
   vi. brake servo
   vii. warning lights
   viii. parking brakes
   ix. equalising valves.

d. The principles and components of electronic ABS systems, electrical and electronic components.

e. The requirements and hazards of brake fluid:
   i. boiling point
   ii. hygroscopic action
   iii. manufacturer’s change periods
   iv. fluid classification and rating
   v. potential to damage paint surfaces.
f. Terms associated with mechanical and hydraulic braking systems:
   i. braking efficiency
   ii. brake fade
   iii. brake balance
   iv. ABS.

g. The procedures used for inspecting the serviceability and condition of the braking system.

h. Braking system defects:
   i. worn shoes or pads
   ii. worn or scored brake surfaces
   iii. abnormal brake noises
   iv. brake judder
   v. fluid contamination of brake surfaces
   vi. fluid leaks
   vii. pulling to one side
   viii. poor braking efficiency
   ix. lack of servo assistance
   x. brake drag
   xi. brake grab
   xii. brake fade.

Wheel and tyres

a. The construction of different types of tyre:
   i. radial
   ii. cross ply
   iii. bias belted
   iv. tread patterns
   v. tyre mixing regulations
   vi. tyre applications.

b. Tyre markings:
   i. tyre and wheel size markings
   ii. speed rating
   iii. direction of rotation
   iv. profile
   v. load rating
   vi. ply rating
   vii. tread-wear indicators.

c. Wheel construction:
   i. light alloy
   ii. pressed steel and wire wheels
   iii. flat-edge and double hump rims.

d. Types of wheel bearing arrangements:
   i. non-driving.

e. Types of bearing used for wheel bearing arrangements:
   i. roller
   ii. taper roller
   iii. needle
   iv. ball and plain.
f. The procedures used for inspecting the serviceability and condition of:
   i. tyres & wheels
   ii. bearings.

g. The defects associated with tyres and wheels:
   i. abnormal tyre wear
   ii. cuts
   iii. side wall damage
   iv. wheel vibrations
   v. tyre noise (squeal during cornering)
   vi. tyre over heating (low pressure)
   vii. tread separation.

General
The procedures for dismantling, removal and replacement of chassis system components
a. The preparation:
   i. testing and use of tools and equipment
   ii. electrical meters and equipment used for dismantling
   iii. removing and replacing chassis systems and components.

b. Appropriate safety precautions:
   i. PPE
   ii. vehicle protection when dismantling
   iii. removing and replacing chassis systems and components.

c. The importance of logical and systematic processes.

d. The inspection and testing of chassis systems and components.

e. The preparation of replacement units for re-fitting or replacement of chassis systems or components.

f. Identify the reasons why replacement components and units must meet the original specifications (OES):
   i. warranty requirements
   ii. to maintain performance
   iii. safety requirements.

g. Refitting procedures.

h. The inspection and testing of units and systems to ensure compliance with manufacturer's, legal and performance requirements.

i. The inspection and re-instatement of the vehicle following repair to ensure customer satisfaction:
   i. cleanliness of vehicle interior and exterior
   ii. security of components and fittings
   iii. re-instatement of components and fittings.
Unit 155  Knowledge of inspecting light vehicles using prescribed methods

UAN: H/601/3742
Level: 2
Credit value: 4
GLH: 40

Relationship to NOS: This unit is linked to LV05 Inspect Light Vehicles using Prescribed Inspection Methods and LV06 Inspect Light Vehicles.

Assessment requirements specified by a sector or regulatory body: This unit was developed by the IMI, the sector skills council for the automotive retail industry. All assessments have been developed in accordance with the IMI Assessment Requirements for VRQs.

Aim: This unit enables the learner to develop an understanding of carrying out a range of inspections on light vehicles using a variety of prescribed testing and inspection methods.

<table>

Assessment criteria
The learner can:

1.1 explain the difference between the various prescribed light vehicle inspection methods to include:
   a. pre-work
   b. post-work
   c. pre-delivery
   d. maintenance inspection (brake, seasonal and tyre)

1.2 identify the different systems to be inspected when using the prescribed inspection methods

1.3 identify the procedures involved in carrying out the systematic inspection of the prescribed inspection methods on light vehicles

1.4 identify correct conformity of vehicle systems and condition on light vehicles inspections

1.5 compare test and inspection results against light vehicle specification and legal requirements

1.6 explain how to record and complete the inspection results in the format required

1.7 identify the recommendations that can be made based on results of

Unit 155  
Knowledge of inspecting light vehicles using prescribed methods

Supporting information

Candidates will be assessed on the assessment criteria as specified within the unit. The following information has been provided by IMI SSC and is included to support centres in terms of teaching and delivery.

Pre and post work vehicle inspections and record findings

a. PPE and vehicle protection relating to:
   i. vehicle body panels
   ii. paint surfaces
   iii. seats
   iv. carpets and floor mats prior to conduction vehicle inspections.

b. Pre and post work vehicle inspection procedures:
   i. aural
   ii. visual and functional assessments on engine
   iii. engine systems
   iv. chassis systems
   v. wheels and tyres
   vi. transmission system
   vii. electrical and electronic systems
   viii. exterior vehicle body
   ix. vehicle interior.

c. The methods for carrying out inspections for: damage, corrosion, fluid leaks, wear, security, mounting security and condition to include:
   i. engines and engine systems
   ii. chassis systems
   iii. brakes
   iv. steering
   v. suspension
   vi. wheels
   vii. tyres
   viii. body panels
   ix. electrical and electronic systems and components
   x. vehicle seating and vehicle interior
   xi. vehicle instrumentation
   xii. driver controls.

d. Check conformity to manufacturer's specifications and legal requirements.

e. Completion of documentation to include:
   i. inspection records
   ii. job cards
   iii. vehicle records.

f. Make recommendations based on results of vehicle inspections.

g. The checks necessary to ensure customer satisfaction for:
   i. vehicle body panels
   ii. paint surfaces
   iii. seats
iv. carpets and floor mats following pre or post vehicle inspections.
h. Prepare and use appropriate inspection equipment and tools.
i. Inspection procedures following inspection checklists.
Unit 161

Knowledge of overhauling light vehicle engine units

- **UAN:** R/601/3736
- **Level:** 3
- **Credit value:** 3
- **GLH:** 20
- **Relationship to NOS:** This unit is linked to LV11 Overhaul Light Vehicle Mechanical Units.

Unit 161  Knowledge of overhauling light vehicle engine units

Supporting information

Candidates will be assessed on the assessment criteria as specified within the unit. The following information has been provided by IMI SSC and is included to support centres in terms of teaching and delivery.

How the units and assemblies being overhauled operate
a. Identify unit components.
b. Understand unit construction.
c. Describe unit operation.

How units are dismantled and reassembled
a. The dismantling procedure.
b. Tools and equipment used for stripping and rebuilding units and assemblies.
c. Methods of safe storage for removed components during overhaul activities.
d. The process for assessing the condition of sub-assemblies including:
   i. fit
   ii. tolerances
   iii. permitted limits.
e. The rebuild procedure for units and assemblies.
f. Adjustment procedures during re-assembly.

Unit and assembly testing and evaluation procedures
a. Appropriate testing and evaluation procedures prior to dismantling units.
b. Appropriate testing and evaluation procedures of components after dismantling units.
c. How to use overhauling and test equipment for the task.
d. The cost-benefit relationship between reconditioning, repair and replacement of components within units.
e. How to test and evaluate the performance of the overhauled units against the operating specification.
f. How to interpret test results.
g. Adjustment procedures during final evaluation.

Faults associated with units and assemblies being overhauled
a. Causes of faults and failures within units and assemblies.
b. The faults associated with units and assemblies.
c. How to make adjustments to meet final specification after testing and evaluation of assembled units and assemblies.

The procedures for dismantling, removal and replacement of units and components
a. The preparation, testing and use of:
i. tools and equipment
ii. removal and replacement of electrical and electronic systems and components.
b. Appropriate safety precautions:
   i. PPE
   ii. vehicle protection when dismantling
   iii. removal and replacing electrical and electronic components and systems.

c. The importance of logical and systematic processes.

d. The reasons why replacement components and units must meet the original specifications (OES) – warranty requirements, to maintain performance, safety requirements.

e. Refitting procedures.

f. The inspection and testing of units and systems to ensure compliance with manufacturer's, legal and performance requirements.

g. Inspection and re-instatement of the vehicle following repair to ensure:
   i. customer satisfaction
   ii. cleanliness of vehicle interior and exterior
   iii. security of components and fittings
   iv. re-instatement of components and fittings
   v. cancelling of any fault codes and warning lights.
Unit 162  Knowledge of light vehicle transmission and driveline units and components

UAN: Y/601/3740
Level: 2
Credit value: 5
GLH: 45
Relationship to NOS: This unit is linked to LV12 Remove and Replace Light Vehicle Driveline Units and Components.

Assessment requirements specified by a sector or regulatory body: This unit was developed by the IMI, the sector skills council for the automotive retail industry. All assessments have been developed in accordance with the IMI Assessment Requirements for VRQs.

Aim: This unit enables the learner to develop an understanding of the construction and operation of common transmission and driveline systems. It also covers the procedures involved in the removal and replacement of system components and the evaluation of their performance.

Unit 162  Knowledge of light vehicle transmission and driveline units and components

Supporting information

Candidates will be assessed on the assessment criteria as specified within the unit. The following information has been provided by IMI SSC and is included to support centres in terms of teaching and delivery.

The operation of clutch operating systems
a. Clutch operating mechanisms
   i. pedal and lever
   ii. hydraulic operated
   iii. mechanical
   iv. cable operated
   v. hydraulic components
   vi. master cylinder
   vii. slave cylinder
   viii. hydraulic pipes
   ix. electrical and electronic components (fluid level indicators).

The operation of friction clutches
a. The reasons for fitting a clutch.
b. The construction and operation of:
   i. hydraulically and cable operated clutches
   ii. coil spring clutches
   iii. diaphragm spring clutches
   iv. single plate clutches
   v. multi plate clutches.

The operation of manual gearboxes
a. The reasons for fitting gearboxes, to provide neutral, reverse, torque multiplication.
b. Different gearbox types: transverse and inline layouts.
c. The layout and construction of gears and shafts for 4, 5 and 6 speed gearbox designs, sliding mesh, constant mesh and synchromesh gearboxes reverse gear.
d. The construction and operation of:
   i. gear selection linkages
   ii. selector forks and rods
   iii. detents and interlock mechanisms

e. The construction and operation of synchromesh devices.
f. The arrangements for gearbox bearings:
   i. bushes
   ii. oil seals
   iii. gaskets and gearbox lubrication
   iv. speedometer drive

g. The electrical and electronic components including reverse lamp switch
h. Calculate gear ratios and driving torque for typical gearbox specifications.

**The operation of driveline components**

a. The layout and construction of propshafts and drive shafts used in front wheel, rear wheel and four-wheel drive systems.

b. The reasons for using flexible couplings and sliding joints in transmissions systems.

c. The reason for using constant velocity joints in drive shafts incorporating steering mechanisms.

d. The construction and operation of:
   i. universal joints
   ii. sliding couplings
   iii. constant velocity joints

e. The simple stresses applied to shafts: torsional, bending and shear.

f. The construction and operation of:
   i. final drive units
   ii. crown wheel & pinion
   iii. bevel
   iv. hypoid and helical gears
   v. differential gears
   vi. sun & planet gears
   vii. lubricants
   viii. lubrication bearings and seals
   ix. limited slip differential.

g. The reasons for fitting a differential.

h. Calculate final drive gear ratios.

i. Calculate the overall gear ratio from given data (gearbox ratio x final drive ratio).

**The testing and inspection techniques used for light vehicle transmission systems**

a. The techniques and procedures used for inspecting and testing clutches and clutch mechanisms including:
   i. clearances
   ii. pedal and lever settings
   iii. cables & linkages
   iv. hydraulic system
   v. leaks
   vi. adjustments
   vii. travel.

b. The techniques and procedures used for inspecting and testing gearboxes including:
   i. leaks
   ii. gear selection
   iii. synchromesh operation
   iv. abnormal noise.

c. The techniques and procedures used for inspecting and testing drive line systems (prop & drive shafts, couplings) including:
   i. security
   ii. serviceability of rubber boots
   iii. leaks
   iv. alignment
   v. balance weights (where applicable).

d. The techniques used when inspecting and testing final drive systems including:
   i. fluid levels
ii. leaks
iii. noise.

The faults and symptoms associated with vehicle transmissions systems
a. The faults and symptoms associated with transmission systems:
   i. clutch faults
   ii. gearbox faults
   iii. drive line faults (propshaft, drive shaft, universal and constant velocity joints)
   iv. universal joint alignment
   v. final drive faults.
b. Faults and symptoms to include mechanical, electrical and hydraulic systems.

The procedures for dismantling, removal and replacement of transmission units and components
a. The preparation, testing and use of tools and equipment, electrical meters and equipment used for dismantling removing and replacing transmission systems and components.
b. appropriate safety precautions:
   i. PPE
   ii. vehicle protection when dismantling
   iii. removing and replacing transmission systems and components
c. The importance of logical and systematic processes.
d. The inspection and testing of transmission systems and components
e. The preparation of replacement units for re-fitting or replacement of transmission systems or components.
f. The reasons why replacement components and units must meet the original specifications (OES):
   i. warranty requirements
   ii. to maintain performance
   iii. safety requirements.
g. Refitting procedures.
h. The inspection and testing of units and system to ensure compliance with manufacturer’s, legal and performance requirements.
i. The inspection and re-instatement of the vehicle following repair to ensure customer satisfaction:
   i. cleanliness of vehicle interior and exterior
   ii. security of components and fittings.
   iii. re-instatement of components and fittings

Types of wheel bearing arrangements:
a. driven wheels
b. fully floating
c. three quarter floating
d. semi floating axles.

Unit 172 Knowledge of light vehicle fuel, ignition, air and exhaust system units and components

Supporting information

Candidates will be assessed on the assessment criteria as specified within the unit. The following information has been provided by IMI SSC and is included to support centres in terms of teaching and delivery.

Fuel - Petrol
a. The function and layout of petrol injection systems:
   i. single and multi-point systems
   ii. injection components
   iii. injection pump
   iv. pump relay
   v. injector valve
   vi. air flow sensor
   vii. throttle potentiometer
   viii. idle speed control valve
   ix. coolant sensor
   x. MAP and air temperature sensors
   xi. mechanical control devices
   xii. electronic control units.
b. The operation of single and multi-point petrol injection systems and components:
   i. injection pump
   ii. pump relay
   iii. injector valve
   iv. air flow sensor
   v. throttle potentiometer
   vi. idle speed control valve
   vii. coolant sensor
   viii. MAP and air temperature sensors
   ix. electronic control units
   x. fuel pressure regulators
   xi. fuel pump relays
   xii. lambda exhaust sensors
   xiii. flywheel and camshaft sensors
   xiv. air flow sensors (air flow meter and air mass meter)
   xv. EGR valve.
c. The procedures used when inspecting petrol system.

Fuel – Diesel
a. The layout and construction of inline and rotary diesel systems.
b. The principles and requirements of compression ignition engines:
i. combustion chambers (direct and indirect injection).

c. The function and operation of diesel fuel injection components:
   ii. fuel filters
   iii. sedimenters
   iv. injectors
   v. injector types (direct and indirect injection)
   vi. single
   vii. multi-hole and pintle nozzle types
   viii. governors
   ix. fuel pipes
   x. glow plugs
   xi. cold start devices.
   xii. fuel cut-off solenoid.

d. The purpose and operation of:
   i. turbochargers
   ii. construction
   iii. use of inter-coolers.

e. Explain the procedures for injection pump timing and bleeding the system.

f. The procedures used when inspecting diesel system.

Fuel

a. The meaning of terms related to:
   i. hydro-carbon fuels
   ii. volatility
   iii. calorific value
   iv. flash point
   v. octane value
   vi. cetane value.

b. The composition of hydro-carbon fuels:
   i. % hydrogen and carbon in petrol and diesel fuels.

c. The composition of air (% nitrogen, oxygen), % of oxygen.

d. The chemically correct air/fuel ratio for petrol engines as 14.7:1 (lambda 1, stoichiometric ratio).

e. Weak and rich air/fuel ratios for petrol engines.

f. Exhaust composition and by-products for chemically correct, rich and weak air/fuel ratios of petrol engines:
   i. water vapour (H₂O)
   ii. nitrogen (N)
   iii. carbon monoxide (CO)
   iv. carbon dioxide (CO₂)
   v. carbon (C)
   vi. hydrocarbon (HC)
   vii. oxides of nitrogen (NOₓ, NO₂, NO) and particulates.

g. The relative advantages and disadvantages of diesel and petrol engines.

h. Symptoms and faults associated with fuel systems
   i. diesel fuel system: air in fuel system, water in fuel, filter blockage, leaks, difficult starting, erratic running, excessive smoke (black, blue, white), engine knock, turbocharger faults
   ii. petrol injection system: leaks, erratic running, excessive smoke, poor starting, poor performance, poor fuel economy, failure to
start, exhaust emissions, running-on, excessive fuel consumption and surging.

**Ignition**

a. The layout of electronic ignition systems, advantages over conventional systems (points).

b. Electronic ignition circuits and components:
   i. LT Circuit
   ii. battery
   iii. ignition switch
   iv. electronic trigger devices
   v. capacitor
   vi. HT Circuit
   vii. spark plugs (reach, heat range, electrode features and electrode polarity)
   viii. rotor arm
   ix. distributor (if applicable)
   x. distributor cap
   xi. ignition leads
   xii. ignition coil
   xiii. ignition timing advance system.

c. The operation electronic system components:
   i. amplifiers
   ii. triggering systems
   iii. inductive pick-ups
   iv. hall generators
   v. optical pulse generators
   vi. control units.

d. The operation of amplifier units.

e. Ignition terminology:
   i. dwell angle
   ii. dwell time
   iii. dwell variations
   iv. advance and retard of ignition timing
   v. static and dynamic ignition timing.

f. The operation of electronic ignition systems under various conditions and loads to include:
   i. engine idling
   ii. during acceleration
   iii. under full load
   iv. cruising
   v. overrun
   vi. cold starting.

g. The principles of engine management systems:
   i. closed loop system
   ii. integrated ignition
   iii. injection systems
   iv. sensors.

h. The procedures used when inspecting:
   i. ignition system
   ii. engine management
iii. sensors.

i. Symptoms and faults associated with ignition system operation:
   i. Failure to start hot or cold, erratic running, poor performance, misfire, exhaust emissions misfiring and ignition noise (pinking).

**Air supply and exhaust systems**

a. The construction and purpose of air filtration systems.
b. The operating principles of air filtration systems.
c. The construction and purpose of the exhaust systems.
d. The operating principles of the systems.
e. Exhaust system design to include silencers and catalytic converters.
f. The procedures used when inspecting induction, air filtration and exhaust systems.
g. Symptoms and faults associated with air and exhaust systems:
   i. exhaust gas leaks
   ii. air leaks.

**General**

a. The preparation, testing and use of tools and equipment used for:
   i. dismantling
   ii. removal and replacement of engine units and components.
b. Appropriate safety precautions:
   i. PPE
   ii. vehicle protection when dismantling
   iii. removal and replacing engine units and components.
c. The importance of logical and systematic processes.
d. The inspection and testing of engine units and components.
e. The preparation of replacement units for re-fitting or replacement.
f. The reasons why replacement components and units must meet the original specifications (OES) – warranty requirements, to maintain performance and safety requirements.
g. Refitting procedures.
h. The inspection and testing of units and system to ensure compliance with manufacturer’s, legal and performance requirements.
i. The inspection and re-instatement of the vehicle following repair to ensure customer satisfaction:
   i. cleanliness of vehicle interior and exterior
   ii. security of components and fittings
   iii. re-instatement of components and fittings.
Unit 181  
**Knowledge of overhauling light vehicle steering and suspension units**

### Learning outcome

<table>
<thead>
<tr>
<th>The learner will:</th>
</tr>
</thead>
<tbody>
<tr>
<td>1 understand how to overhaul light vehicle steering and suspension units</td>
</tr>
</tbody>
</table>

### Assessment criteria

The learner can:

| 1.1 identify light vehicle steering and suspension unit components |
| 1.2 describe the construction and operation of light vehicle steering and suspension units |
| 1.3 explain how to prepare, use and assess all of the overhauling equipment |
| 1.4 explain how light vehicle steering and suspension units are dismantled, overhauled and reassembled |
| 1.5 explain common symptoms, causes and faults found in light vehicle steering and suspension units |
| 1.6 explain methods used to identify steering and suspension unit faults |
| 1.7 explain how to examine, measure and make suitable adjustments to light vehicle steering and suspension components |
| 1.8 explain how to evaluate and interpret test results found in diagnosing light vehicle steering and suspension unit faults and compare with manufacturers' specifications and settings |
| 1.9 explain how to evaluate the operation of components and systems following overhauling units to confirm system performance. |
Unit 181  Knowledge of overhauling light vehicle steering and suspension units

Supporting information

Candidates will be assessed on the assessment criteria as specified within the unit. The following information has been provided by IMI SSC and is included to support centres in terms of teaching and delivery.

How the units and assemblies being overhauled operate
a. Identify unit components.
b. Understand unit construction.
c. Describe unit operation.

How units are dismantled and reassembled
a. The dismantling procedure.
b. Tools and equipment used for stripping and rebuilding units and assemblies.
c. Methods of safe storage for removed components during overhaul activities.
d. The process for assessing the condition of sub-assemblies including:
   i. fit
   ii. tolerances
   iii. permitted limits.
e. The rebuild procedure for units and assemblies.
f. Adjustment procedures during re-assembly.

Unit and assembly testing and evaluation procedures
a. Appropriate testing and evaluation procedures prior to dismantling units.
b. Appropriate testing and evaluation procedures of components after dismantling units.
c. How to use overhauling and test equipment for the task.
d. The cost-benefit relationship between reconditioning, repair and replacement of components within units.
e. How to test and evaluate the performance of the overhauled units against the operating specification.
f. How to interpret test results.
g. Adjustment procedures during final evaluation.

Faults associated with units and assemblies being overhauled
a. Causes of faults and failures within units and assemblies.
b. The faults associated with units and assemblies.
c. How to make adjustments to meet final specification after testing and evaluation of assembled units and assemblies.
The procedures for dismantling, removal and replacement of electrical and electronic units and components

a. The preparation, testing and use of:
   i. tools and equipment
   ii. removal and replacement of electrical and electronic systems and components.

b. Appropriate safety precautions:
   i. PPE
   ii. vehicle protection when dismantling
   iii. removal and replacing electrical and electronic components and systems.

c. The importance of logical and systematic processes.

d. Preparation of replacement units for re-fitting or replacement electrical and electronic components and systems.

e. The reasons why replacement components and units must meet the original specifications (OES) – warranty requirements, to maintain performance, safety requirements.

f. Refitting procedures.

g. The inspection and testing of units and systems to ensure compliance with manufacturer’s, legal and performance requirements.

h. Inspection and re-instatement of the vehicle following repair to ensure:
   i. customer satisfaction
   ii. cleanliness of vehicle interior and exterior
   iii. security of components and fittings
   iv. re-instatement of components and fittings
   v. cancelling of any fault codes and warning lights.
Unit 218  
Skills in removing and fitting of basic light vehicle mechanical, electrical and trim (MET) components and non-permanently fixed vehicle body panels

UAN: K/601/3869
Level: 2
Credit value: 3
GLH: 20
Relationship to NOS: This unit is linked to BP18 Remove and Fit Basic Motor Mechanical, Electrical and Trim (MET) Components and Non Permanently Fixed Motor Vehicle Body Panels.

Assessment requirements specified by a sector or regulatory body: This unit was developed by the IMI, the sector skills council for the automotive retail industry. All assessments have been developed in accordance with the IMI Assessment Requirements for VRQs.

Aim: This unit allows the learner to demonstrate they can carry out a range of removal and fitting of basic mechanical, electrical and trim (MET) components and non-permanently fixed light vehicle body panels. It also covers the evaluation of the operation of the components when fitted.

<table>
<thead>
<tr>
<th>Learning outcome</th>
<th>The learner will:</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>be able to work safely when carrying out removal and fitting of basic MET components and non-permanently fixed light vehicle body panels</td>
</tr>
</tbody>
</table>

Assessment criteria

The learner can

1.1 use suitable personal protective equipment and vehicle coverings throughout all light vehicle removal and fitting of basic MET components and non-permanently fixed light vehicle body panels

1.2 work in a way which minimises the risk of damage or injury to the vehicle, people and the environment.
<table>
<thead>
<tr>

<tbody>
<tr>
<td>1</td>
<td>understand how to carry out removal and fitting of basic light vehicle mechanical electrical and trim (MET) components</td>
</tr>
</tbody>
</table>

**Assessment criteria**

The learner can

1.1 identify the procedures involved in carrying out the systematic removal and fitting of basic light vehicle MET components to the standard required including:

a. bumpers  
b. headlamp units  
c. road wheels  
d. batteries  
e. bonnet and boot trim  
f. interior trim components  
g. exterior trim components
### Learning outcome | The learner will:
--- | ---
2 | understand how to carry out removal and fitting of basic light vehicle non-permanently fixed vehicle body panels

### Assessment criteria

**The learner can**

2.1 | identify the procedures involved in carrying out the systematic removal and fitting of basic light vehicle non-welded, non-structural body panels to the standard required including:
   - wings
   - doors
   - bonnets
   - boot lids and tailgates
   - bumper bars, covers and components

2.2 | identify the procedures involved in working with supplementary safety systems when fitting basic light vehicle non-welded, non-structural body panels

2.3 | explain the methods and procedures for storing removed light vehicle non-welded, non-structural body panels

2.4 | identify the different types of fastenings and fixings used when removing and fitting light vehicle non-welded, non-structural body panels

2.5 | explain the reasons for the use of different types of fastenings and fixings used in light vehicle non-welded, non-structural body panels

2.6 | explain the procedures, methods and reasons for ensuring correct alignment of light vehicle non-welded, non-structural body panels

2.7 | identify the quality checks that can be used to ensure correct alignment and operation of light vehicle non-welded, non-structural body panels

2.8 | identify correct conformity of vehicle systems against light vehicle specification and legal requirements on completion

2.9 | explain the procedure for reporting cosmetic damage to light vehicle non-welded, non-structural body panels.
Candidates will be assessed on the assessment criteria as specified within the unit. The following information has been provided by IMI SSC and is included to support centres in terms of teaching and delivery.

Describe procedures to prevent damage to the vehicle, components and contents when removing, storing and refitting basic MET components

a. The methods that can be used to protect undamaged items to ensure they are removed and refitted without causing unnecessary damage:
   i. bumpers
   ii. headlamp units
   iii. road wheels
   iv. batteries
   v. bonnet and boot trim
   vi. interior trim components
   vii. exterior trim components.

b. The procedures for the correct storage of vehicle contents.

c. The process for the reporting of extra damage and items that may have broken when removed or refitted.

The processes involved when handling batteries

a. The procedure for the removal, storage and refitting of lead acid batteries.

b. The procedure for the disposal of lead acid batteries.

c. Battery checks:
   i. electrolyte
   ii. discharge
   iii. specific gravity.

d. The charging process and procedures:
   i. trickle charge
   ii. normal charge
   iii. boost / start.

e. The health and safety issues involved when charging (explosive gasses).
Types of clips and fixings
a. The following types of clips and identify reasons and limitations for their use:
   i. speed
   ii. ‘c’
   iii. ‘d’
   iv. ‘j’ type captive nut
   v. ‘r’
   vi. ‘u’ type captive nut
   vii. cable clip
   viii. trim clips.

b. The following types of fixings and identify reasons and limitations for their use:
   i. pop rivet
   ii. plastic rivet
   iii. plastic capture nut
   iv. nut and bolt
   v. soulder bolt
   vi. ‘Nyloc’ type nuts
   vii. washers
   viii. ‘Spring’ type washers
   ix. self tapping screws and bolts
   x. quick release plastic trim fastenings
   xi. trim tapes
   xii. adhesives and sealers.

The processes involved when carrying out quality checks
a. Items that may have been ‘workshop’ soiled and describe processes for rectifying:
   i. door cards
   ii. seats
   iii. carpets
   iv. boot and bonnet trims

b. Methods for checking gaps.

c. The process for checking and aligning headlamps:
   i. address handling procedures for halogen bulbs
   ii. address handling and health and safety issues relating to xenon bulbs and systems.

d. Operational checks and rectification methods to include:
   i. lights
   ii. washers and wipers
   iii. SRS systems (checking not rectification)
   iv. charging system (checking not rectification)
   v. horn
   vi. fluid levels
   vii. interior switches
   viii. operation of door lock mechanisms.
Removing and Fitting Non-Structural Body Panels

a. Find, interpret and use sources of information applicable to the removal and fitting of basic non welded non-structural body panels.

b. Select check and use all the tools and equipment required to remove and fit basic non welded non-structural body panels including:
   i. hinge pin removers
   ii. spanners
   iii. screwdrivers.

c. The different types of mechanical fixings for non welded non-structural body panels and when and why they should be used including:
   i. bolts
   ii. self tapping bolts
   iii. speed nuts
   iv. washers.

d. The correct procedures and processes for removing and fitting of non welded non-structural body panels.

e. The need for correct alignment of panels and methods to achieve this:
   i. aperture gaps
   ii. alignment of panel features
   iii. best fit of components to panels
   iv. vehicle geometry
   v. operation of openings such as doors, tailgates, bonnets etc.

f. The types of quality control checks that can be used to ensure correct alignment and contour of panels and operation of components to manufacturer’s specification.

g. The method of storing removed panels and the importance of storing them correctly.
Appendix 1  Relationships to other qualifications

Links to other qualifications
Mapping is provided as guidance and suggests areas of commonality between the qualifications. It does not imply that candidates completing units in one qualification have automatically covered all of the content of another.

Centres are responsible for checking the different requirements of all qualifications they are delivering and ensuring that candidates meet requirements of all units/qualifications.

These qualifications have connections to the 4270 Level 2/3 VCQs in Light Vehicle Maintenance and Repair.

Literacy, language, numeracy and ICT skills development
These qualifications can develop skills that can be used in the following qualifications:

- Functional Skills (England) – see www.cityandguilds.com/functionalskills
- Essential Skills (Northern Ireland) – see www.cityandguilds.com/essentialskillsni
- Essential Skills Wales – see www.cityandguilds.com/esw
Appendix 2  Sources of general information

The following documents contain essential information for centres delivering City & Guilds qualifications. They should be referred to in conjunction with this handbook. To download the documents and to find other useful documents, go to the Centres and Training Providers homepage on www.cityandguilds.com.

**Centre Manual - Supporting Customer Excellence** contains detailed information about the processes which must be followed and requirements which must be met for a centre to achieve ‘approved centre’ status, or to offer a particular qualification, as well as updates and good practice exemplars for City & Guilds assessment and policy issues. Specifically, the document includes sections on:

- The centre and qualification approval process
- Assessment, internal quality assurance and examination roles at the centre
- Registration and certification of candidates
- Non-compliance
- Complaints and appeals
- Equal opportunities
- Data protection
- Management systems
- Maintaining records
- Assessment
- Internal quality assurance
- External quality assurance.

**Our Quality Assurance Requirements** encompasses all of the relevant requirements of key regulatory documents such as:

- Regulatory Arrangements for the Qualifications and Credit Framework (2008)
- SQA Awarding Body Criteria (2007)
- NVQ Code of Practice (2006)

and sets out the criteria that centres should adhere to pre and post centre and qualification approval.
**Access to Assessment & Qualifications** provides full details of the arrangements that may be made to facilitate access to assessments and qualifications for candidates who are eligible for adjustments in assessment.

The **centre homepage** section of the City & Guilds website also contains useful information such as:

- **Walled Garden**: how to register and certificate candidates online
- **Qualifications and Credit Framework (QCF)**: general guidance about the QCF and how qualifications will change, as well as information on the IT systems needed and FAQs
- **Events**: dates and information on the latest Centre events
- **Online assessment**: how to register for e-assessments.

About City & Guilds
As the UK’s leading vocational education organisation, City & Guilds is leading the talent revolution by inspiring people to unlock their potential and develop their skills. We offer over 500 qualifications across 28 industries through 8500 centres worldwide and award around two million certificates every year. City & Guilds is recognised and respected by employers across the world as a sign of quality and exceptional training.

City & Guilds Group
The City & Guilds Group operates from three major hubs: London (servicing Europe, the Caribbean and Americas), Johannesburg (servicing Africa), and Singapore (servicing Asia, Australia and New Zealand). The Group also includes the Institute of Leadership & Management (management and leadership qualifications), City & Guilds Land Based Services (land-based qualifications), the Centre for Skills Development (CSD works to improve the policy and practice of vocational education and training worldwide) and Learning Assistant (an online e-portfolio).
