22nd May 2015

Dear Patricia

City & Guilds' Automotive Qualification

Doncaster College is a large provider of further education in South Yorkshire. It is also one of the largest providers of higher education in this region.

During the last academic year, more than 20,000 people enrolled on more than 500 part and full-time courses. Across its two main campuses, the College employs around 1,000 staff and accommodates students aged 16+.

As a leading FE college City College we would like to support the following qualification which has been developed in consultation with the industry and help learners progress onto further learning within the retail motor industry sector:

600/1177/4 Level 2 Certificate in Light Vehicle Maintenance and Repair Principles

This qualification provides the introductory skills and knowledge to understand the work carried out by Light Vehicle Maintenance Technicians. It is a very useful pre-apprenticeship platform which allows learners to progress smoothly into the Level 2 Diploma in Light Vehicle Maintenance and Repair Principles (500/9707/6) which is part of the intermediate apprenticeship in maintenance and repair.

As a full time student, learners will be able to progress into the Level 3 Diploma in Light Vehicle Maintenance and Repair Principles (501/0019/1).

The qualification also provides learners with increased self-confidence and motivation to take advantage of the many opportunities for progression and development within the industry.

Yours sincerely,

John Ellis
