4292-522 MARCH 2018
Level 2 Technical Certificate in Automotive
Level 2 Automotive – Theory Exam (1)

If provided, stick your candidate barcode label here.

Thursday 15 March 2018
09:30 – 11:30

Candidate name (first, last)
First
Last
Candidate enrolment number
Date of birth (DDMMYYYY)
Gender (M/F)
Assessment date (DDMMYYYY)
Centre number
Candidate signature and declaration*

• If any additional answer sheets are used, enter the additional number of pages in this box.
• Please ensure that you staple additional answer sheets to the back of this answer booklet, clearly labelling them with your full name, enrolment number, centre number and qualification number in BLOCK CAPITALS.
• All candidates need to use a black/blue pen. Do not use a pencil or gel pen.
• If provided with source documents, these documents will not be returned to City & Guilds, and will be shredded. Do not write on the source documents.
• I declare that I had no prior knowledge of the questions in this assessment and that I will not divulge to any person any information about the questions.

You should have the following for this assessment
• a pen with blue or black ink

General instructions
• Use black or blue ball-point pen. Use pencil for drawing only.
• The marks for questions are shown in brackets.
• This examination contains 12 questions. Answer all questions.
• Answer the questions in the spaces provided. Answers written in margins or on blank pages will not be marked.
• Cross through any work you do not want to be marked.
• Write all your working out and answers in this booklet.

9 a) i) Explain why it is important **not** to disconnect a battery when the engine is running. (2 marks)

ii) State **three** pieces of equipment that are used to check for correct operation of a vehicle’s charging system. (3 marks)

b) State **two** internal faults that can affect a vehicle’s battery. (2 marks)
10 a) Identify the drive layout of the vehicle shown in Figure 5. (1 mark)

Figure 5

Source: https://www.iamnotanartist.org

b) Describe how the drive is transmitted from the gearbox to the road wheels in the system shown in Figure 5. (3 marks)

11 State one advantage and one disadvantage of using a dual clutch (DSG) gearbox. (2 marks)
A customer has brought their vehicle into the workshop. They have informed the Service Advisor that the vehicle steering wheel is not aligned after hitting a kerb.

You have been asked to look at the vehicle and to check for any damage and misalignment.

Propose a thorough explanation of how to carry out these checks including health and safety considerations, identification and description of the components that could be damaged and why it could cause the fault. (9 marks)
