

4310/90 SVQ and VRQ Light Vehicle Tracking Sheets

The tracking sheets originally produced for this qualification have recently been reviewed and this has resulted in further clarification being included regarding evidence requirements. In some cases the original information did not provide sufficient clarity and therefore allowed some differences of interpretation, these anomalies have now been addressed.

The tracking sheets for the competency units have now been combined with the relevant short-answer questions to provide individual assessment packs per level and pathway which includes the internally assessed documentation required, these are available to download from the City & Guilds website under 4310.

Some minor format changes have also been made in order to provide further clarity and consistency.

Two things to note:

1. The evidence requirements stated on the tracking sheets indicate the minimum evidence required to meet the assessment criteria. Depending on the situation additional evidence may be required.
2. Candidates completing both the VCQ & VRQ must meet the assessment requirements of both qualifications. For example, if the VCQ requires two observations and the VRQ three observations, then a minimum of three observations must be recorded. However only two of these need to be from the workplace the third can be produced within the centre but must meet current industry practice and standards.

The table below indicates the units where the original evidence may have been misinterpreted.

Unit	NoS	Comment re evidence requirement
001	G1	No change
002	G2	No change
003	G3	No change
004	G4	Working with plastics has been added
006	G6	No change
008	G8	No change
101	LV01	No change
102	LV02	No change
103	LV03	Change to VCQ & VRQ evidence requirements, these now include starting and charging systems
104	LV04	Clarification of observed evidence requirement for VRQ
105	LV05	No change
107	LV07	No change
108	LV08	Clarification of VRQ evidence requirement - must include all areas listed
112	LV12	Clarification of VRQ evidence requirement – two observations may be needed in some cases.
111/121/131	LV11	No change
218	BP18	No change
406	AE06	Evidence must include starting and charging systems

All candidates must be using these revised tracking sheets or amended previous versions to show how the Evidence Requirements are being met for both qualifications in full.
