

Dear centre,

Level 3 Diploma in Electrical Power Engineering - Distribution and Transmission (Technical Knowledge).

Based on a number of customer feedback the following changes have been made to the 2339-45 unit 406 Assessment. Updated version of the assessment and answer packs is now available on the City and Guilds webs site.

Please discard previous versions of the assessment and answer packs and download the new version from the city and guilds website.

With immediate effect change to unit 406 Mathematics **in power engineering**.

- The grade criteria has changed from 60/70/80 to 50/60/70
- In retrospect of this change candidates who have sat the test and failed, centres should re-grade these candidates according to the new grading criteria and submit the results for candidates who passed.

Thanks

BSE Team
