Letter of recognition for City & Guilds qualifications

Dear Jerry Voinquel,

RenewableUK is the UK's leading renewable energy trade association. Founded in 1978 and formerly known as the British Wind Energy Association, RenewableUK represents over 550 companies and organisations across the full value chains of the wind and marine renewable energy industries. We act as a united representative voice for our members and a central point of information, conducting research, organising events, and facilitating business development opportunities for the sector.

I provide my support as an industry body within the Electrical Power Engineering sector, as I feel the following qualifications are suitable for a young person between the ages of 16-19 studying full-time and will give that young person an advantage when applying for a job or progressing onto an apprenticeship.

We, RenewableUK, support the inclusion of:

2339-17 Level 2 Diploma in Electrical Power Engineering - Distribution and Transmission (Technical Knowledge) (QAN): 500/9992/9

in the DfE 2017 performance tables in the Substantial Vocational Qualification category.

We confirm that we consent to our company name (and logo) being made publicly available on the DfE and City & Guilds websites

Yours Sincerely

Sophie Bennett
Skills and Employment Policy Officer
