

## **City & Guilds 6157 Streetworks Excavation and Reinstatement Update**

Product update – March 2017

Change of Qualification Number

On 6 April 2017, new regulations come into force in England, *The Street Works (Qualifications of Operatives and Supervisors) (England) Regulations 2016*.

This has led to a change in certification for the *Streetworks Excavation and Reinstatement* qualification, where each of the 16 units can now be certificated.

There will now be two “key certificates” for operatives; *Location & avoidance of underground apparatus*; and *Signing, lighting and guarding*. As well as two “key certificates” for supervisors; *Location & avoidance of underground apparatus*; and *Monitoring signing, lighting and guarding*.

As long as you hold one, or both, of the key certificates, you can choose to hold as many or as few of the other units to suit the work that you do.

Please note, there have been no further changes to the units or assessments at this time. These changes will not affect your existing certificates or street works cards, and they will remain valid until they expire.

For further information please see the guidance document provided by the Department of Transport:

**From 6 April 2017, centres will therefore be required to register candidates on two new pathways to claim the unit certificates; 6157-01 for initial assessments and 6157-02 for reassessments. Centres currently approved to deliver the old 6156 pathways will have been given automatic approval to deliver 6157.**
