As you should now be aware from our previous communications The HAUC Training and Accreditation group has been working over the past few months on reviewing the question bank, developing an updated assessment strategy, and discussing EQA Standardisation.

Following on from our previous letter we would like to update you all with regards to the updated documentation and Question bank and the agreed timelines with all Awarding Organisations (AO's).

It has now been agreed with all the AO's that the question bank revisions and revised processes will now go live 2<sup>nd</sup> December 2024.

The AO's will receive some further small changes to the Question bank which will be updated over the coming weeks, and they are organising their system updates ready for the above date.

The Assessment Strategy and Centre Compliance documents sent out previously to all for information may also be subject to some minor updates following feedback from the wider community, this is subject to a review by the HAUC T&A group in the next week, but any revisions will be completed and documents reissued as required and shared as previously by all AO's on or before 2<sup>nd</sup> December 2024.

The Assessment Standards and Test Specifications for all modules are also being finalised and updated accordingly and these will also be made available as above.

It has been agreed between HAUC and the AO's we will have a one-month transition period for all of the new documentation and requirements. Therefore, from the 2<sup>nd</sup> January 2025 all training centres will be expected to be complying with the new requirements and will be subject to audit against those requirements from that date.

Kind regards

**Mark Playforth**
