

# TO KNOCK DOWN DOORS NOT JUST OPEN THEM

## IT TAKES TECHBAC

### STAND OUT FROM THE CROWD

TechBac is an exciting new course that will help you get ahead and stand out from the crowd. It is designed to develop all the technical and professional skills that allow you to progress to an apprenticeship, university or straight into a job. It includes a new hands-on technical qualification, recognised by employers, with practical work experience and critical workplace skills development, such as team work, enterprise and digital literacy.

### A NEW WAY OF LEARNING

To feel ready for your career you need to develop attitude alongside experience. TechBac does just that. The TechBac Skills Zone will help you to develop the wider workplace skills demanded by employers and gives you the chance to practise and develop your skills in a social learning environment. It's even available on mobile phones and tablets so you can practise at home or on the go.

Telling future employers about your transferable skills is also important so we have created 'Open Badges'. They are a digital way for you to be recognised for what you've learnt.

# KNOCKING DOWN DOORS

TechBac is designed to keep all options open. If you want to go straight into a job or onto an Apprenticeship, you'll have the skills employers are looking for. If you want to go to university, the qualifications will carry UCAS points at Level 3.

## RECOGNISED BY EMPLOYERS

TechBac has been created in consultation with leading employers to ensure you are learning the right workplace skills and behaviours. We've worked with the BBC, Bosch and Microsoft amongst many more.

### TechBac is available at the following levels;

- Level 2 Introductory TechBac for learners aged 14-16
- Level 2 TechBac for learners aged 16-19
- Level 3 Advanced TechBac for learners aged 16-19

## ABOUT CITY & GUILDS

City & Guilds was established in 1878 to ensure that the UK workforce was equipped with the technical skills to drive the economy forward. Today our goal is the same.

Working with FE colleges and education providers, our qualifications, assessments and learning resources, our qualifications provide you with the skills employers demand or need.

### WHAT LEARNERS SAY:

**"I think I will be more than prepared to go into a job after the Techbac. It has given me the confidence to do that."**
